Enhance your image with the NEC Digital Signage Kit. This all-in-one package is designed to provide a cost-effective, turnkey solution that is highly flexible and easily editable. Even non-technical users have the ability to tailor rich media content to a variety of applications and update content on a regular basis.

When paired with an NEC large-screen display, the components of the Digital Signage Kit help to create an effective communication tool. These include mounting, PC hardware, content management software and power suppression.

Most importantly, to assist in getting your message across with dynamic, eye-catching content, NEC’s solution provides you with a design voucher for the development of custom templates utilizing your company logos, images and more. Use a combination of text, graphics, Flash animations, movies and sound to create exciting, informative and custom content that will bring your communication platform to life.

APPLICATIONS

- Lobby Signage System (Feature greetings, achievements and promotions) builds brand awareness while impressing and educating visitors
- Employee Messaging (Post HR reminders, company news, safety reminders and live business metrics) improves staff communication
- Wayfinding (Display campus layout or building directory) reduces visitor questions while communicating vital messaging
- Waiting Room Entertainer reduces perceived wait times for visitors
- Menu Board whets appetites and allows for scheduled item changes
- Advertising creates additional revenue opportunities

Solution Features and Benefits

Custom tilt wall mounting system provides for a clean look while securely housing both the PC and power suppression directly onto the back of the display for easy access

SceneStudio Pro content management software provides users the ability to author and play back rich multimedia content on a large-format display. Text, HTML, TV, movies, Flash, sound, images and scrolling messages can be combined to produce compelling content that will turn the heads of your audience. The Playlist Builder function allows multiple scenes to be grouped into a playlist that can be scheduled around specific time slots and audiences.

EscapeWire Solutions design voucher facilitates the development of a custom background and professionally authored multimedia scene (2-minute loop) designed specifically for your business

NOW Micro Medius Digital Engine, featuring an Intel Core Duo processor (1.5 Ghz), 1GB of RAM and an 80GB hard drive, boasts a sleek and small form factor and digital video capabilities

Tripp Lite’s TLP606B power strip features six outlets and offers economical, built-in AC surge suppression for the protection of sensitive electronics from damage and performance problems due to transient surges. Users also have the ability to turn off all of the components with the flip of one switch.
NEC Digital Signage Kit (DSK3260)

NEC Tilt Wall Mount Kit (WMK3260-L) with PC cabinet and power strip bracketing

Turn your NEC large-screen display into a work of visual art. NEC’s WMK3260-L wall mount kit, an exclusive accessory that supports its 32" - 60" large-screen LCD and plasma displays, provides an ideal solution for users looking to put their display on center stage and, in turn, create more walking/living space. The mount securely houses both the PC and power suppression directly onto the back of the display for a clean look and easy access.
