MultiSync X464UN
MultiSync X464UNV
MultiSync X554UN
MultiSync X554UNS
Declaration of conformity

FCC Information
1. Use the attached specified cables with the MultiSync X464UN (X464UN)/MultiSync X464UNV (X464UNV)/MultiSync X554UN (X554UN)/MultiSync X554UN (X554UN(C))/MultiSync X554UNS (X554UNS) color display so as not to interfere with radio and television reception.
   (1) Please use the supplied power cord or equivalent to ensure FCC compliance.
   (2) Please use a good quality shielded video signal cable.
   Use of other cables and adapters may cause interference with radio and television reception.
2. This equipment has been tested and found to comply with the limits for a class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

If necessary, the user should contact the dealer or an experienced radio/television technician for additional suggestions.
The user may find the following booklet, prepared by the Federal Communications Commission, helpful: “How to Identify and Resolve Radio-TV Interference Problems.” This booklet is available from the U.S. Government Printing Office, Washington, D.C., 20402, Stock No. 004-000-00345-4.

Windows is a registered trademark of Microsoft Corporation.
NEC is a registered trademark of NEC Corporation.
OmniColor is a registered trademark of NEC Display Solutions Europe GmbH in the countries of EU and Switzerland.
DisplayPort and DisplayPort Compliance Logo are trademarks owned by the Video Electronics Standards Association.
All other brands and product names are trademarks or registered trademarks of their respective owners.

HDMI, the HDMI logo and High-Definition Multimedia Interface are trademarks or registered trademarks of HDMI Licensing LLC in the United States and other countries.

Trademark PJLink is a trademark applied for trademark rights in Japan, the United States of America and other countries and areas.

CRESTRON and ROOMVIEW are registered trademarks of Crestron Electronics, Inc. in the United States and other countries.

GPL/LGPL Software Licenses
The product includes software licensed under GNU General Public License (GPL), GNU Lesser General Public License (LGPL), and others.
For more information on each software, see “readme.pdf” inside the “about GPL&LGPL” folder on the supplied CD-ROM.
Important Information

WARNING

TO PREVENT FIRE OR SHOCK HAZARDS, DO NOT EXPOSE THIS UNIT TO RAIN OR MOISTURE. ALSO, DO NOT USE THIS UNIT’S POLARIZED PLUG WITH AN EXTENSION CORD RECEPTACLE OR OTHER OUTLETS UNLESS THE PRONGS CAN BE FULLY INSERTED.

REFRAIN FROM OPENING THE CABINET AS THERE ARE HIGH VOLTAGE COMPONENTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

CAUTION

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, MAKE SURE POWER CORD IS UNPLUGGED FROM WALL SOCKET. TO FULLY DISENGAGE THE POWER TO THE UNIT, PLEASE DISCONNECT THE POWER CORD FROM THE AC OUTLET. DO NOT REMOVE COVER (OR BACK). NO USER SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

This symbol warns user that uninsulated voltage within the unit may have sufficient magnitude to cause electric shock. Therefore, it is dangerous to make any kind of contact with any part inside this unit.

This symbol alerts the user that important literature concerning the operation and maintenance of this unit has been included. Therefore, it should be read carefully in order to avoid any problems.

CAUTION: Please use the power cord provided with this monitor in accordance with the table below. If a power cord is not supplied with this equipment, please contact your supplier. For all other cases, please use a power cord that matches the AC voltage of the power outlet and has been approved by and complies with the safety standard of your particular country.

* When operating the MultiSync monitor with its AC 125-240V power supply, use a power supply cord that matches the power supply voltage of the AC power outlet being used.

NOTE: This product can only be serviced in the country where it was purchased. Use the power cord which has BSMI mark at both ends when you use this monitor in Taiwan.

- The intended primary use of this product is as an Information Technical Equipment in an office or domestic environment.
- The product is intended to be connected to a computer and is not intended for the display of television broadcast signals.

Warning

This is a class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.
Safety Precautions, Maintenance & Recommended Use

FOR OPTIMUM PERFORMANCE, PLEASE NOTE THE FOLLOWING WHEN SETTING UP AND USING THE MULTI-FUNCTION MONITOR:

• DO NOT OPEN THE MONITOR. There are no user serviceable parts inside and opening or removing covers may expose you to dangerous shock hazards or other risks. Refer all servicing to qualified service personnel.

• Do not spill any liquids into the cabinet or use your monitor near water.

• Do not insert objects of any kind into the cabinet slots, as they may touch dangerous voltage points, which can be harmful or fatal or may cause electric shock, fire or equipment failure.

• Do not place any heavy objects on the power cord. Damage to the cord may cause shock or fire.

• Do not place this product on a sloping or unstable cart, stand or table, as the monitor may fall, causing serious damage to the monitor.

• Do not mount this product face up, face down or upside down as it may cause permanent damage to the screen.

• If liquid has been spilled, or objects have fallen into the monitor.

• When the power supply cord or plug is damaged.

• If liquid has been spilled, or objects have fallen into the monitor.

• If the monitor has been exposed to rain or water.

• If the monitor has been dropped or the cabinet damaged.

• If you notice any structural damage such as cracks or unnatural wobbling.

• If the monitor does not operate normally by following operating instructions.

Recommended Use

• For optimum performance, allow 20 minutes for warm-up.

• Rest your eyes periodically by focusing on an object at least 5 feet away. Blink often.

• Position the monitor a 90° angle to windows and other light sources to minimize glare and reflections.

• Clean the LCD monitor surface with a lint-free, non-abrasive cloth. Avoid using any cleaning solution or glass cleaner!

• Do not use primary color blue on a dark background, as it is difficult to see and may produce eye fatigue due to insufficient contrast.

Ergonomics

To realize the maximum ergonomic benefits, we recommend the following:

• Use the preset Size and Position controls with standard signals.

• Use the preset Color Setting.

• Use non-interlaced signals.

• Do not use primary color blue on a dark background, as it is difficult to see and may produce eye fatigue due to insufficient contrast.

Cleaning the LCD Panel

• When the liquid crystal panel is dusty, please gently wipe with a soft cloth.

• Please do not rub the LCD panel with hard material.

• Please do not apply pressure to the LCD surface.

• Please do not use OA cleaner as it will cause deterioration or discolor on the LCD surface.

Cleaning the Cabinet

• Unplug the power supply

• Gently wipe the cabinet with a soft cloth

• To clean the cabinet, dampen the cloth with a neutral detergent and water, wipe the cabinet and follow with a dry cloth.

NOTE: DO NOT clean with benzene thinner, alkaline detergent, alcoholic system detergent, glass cleaner, wax, polish cleaner, soap powder, or insecticide. Rubber or vinyl should not be in contact with the cabinet for an extended period of time. These types of fluids and materials can cause the paint to deteriorate, crack or peel.

Connecting to a TV*

• Cable distribution system should be grounded (earthed) in accordance with ANSI/NFPA 70, the National Electrical Code (NEC), in particular Section 820.93, Grounding of Outer Conductive Shield of a Coaxial Cable.

• The screen of the coaxial cable is intended to be connected to earth in the building installation.

Immediately unplug your monitor from the wall outlet and refer servicing to qualified service personnel under the following conditions:

• When the power supply cord or plug is damaged.

• If liquid has been spilled, or objects have fallen into the monitor.

• If the monitor has been exposed to rain or water.

• If the monitor has been dropped or the cabinet damaged.

• If you notice any structural damage such as cracks or unnatural wobbling.

• If the monitor does not operate normally by following operating instructions.

* The product you purchased may not have this feature.
Your new MultiSync monitor box* should contain the following:

- LCD monitor
- Power cord**
- Video Signal Cable (DisplayPort cable)
- LAN cable
- Setup Manual
- Clamp x 1 (X464UN/X464UNV)/x 3 (X554UN/X554UNS)
- Screw with washer (M4 x 10) x 1 (X464UN/X464UNV)/x 3 (X554UN/X554UNS)
- Thumbscrew for optional stand x 2**2
- CD-ROM

* Remember to save your original box and packing material to transport or ship the monitor.

**1 Type and number of power cords included will depend on the where the LCD monitor is to be shipped. When more than one power cord is included, please use a power cord that matches the AC voltage of the power outlet and has been approved by and complies with the safety standard of your particular country.

**2 Only for X554UN/X554UNS.

Options:
- Wall mount
- Tabletop Stand
- Remote Control Kit (Remote control and sensor)
- Over-frame Kit
Installation

This device cannot be used or installed without the Tabletop Stand or other mounting accessory for support. For proper installation it is strongly recommended to use a trained, NEC authorized service person. Failure to follow NEC standard mounting procedures could result in damage to the equipment or injury to the user or installer. Product warranty does not cover damage caused by improper installation. Failure to follow these recommendations could result in voiding the warranty.

Mounting
DO NOT mount the monitor yourself. Please ask dealer. For proper installation it is strongly recommended to use a trained, qualified technician. Please inspect the location where the unit is to be mounted. Mounting on wall or ceiling is the customer’s responsibility. Not all walls or ceilings are capable of supporting the weight of the unit. Product warranty does not cover damage caused by improper installation, remodelling, or natural disasters. Failure to comply with these recommendations could result in voiding the warranty.

DO NOT block ventilated openings with mounting accessories or other accessories.

For NEC Qualified Personnel:
To ensure safe installation, use two or more brackets to mount the unit. Mount the unit to at least two points on the installation location.

Please note the following when mounting on wall or ceiling
• When using mounting accessories other than those that are NEC approved, they must comply with the VESA-compatible (FDMiv1) mounting method.
• NEC recommends mounting interfaces that comply with UL1678 standard in North America.
• X464UN/X464UNV: NEC strongly recommends using size M6 screws (10-12 mm + thickness of bracket and washer in length). If using screws longer than 10-12 mm, check the depth of the hole. (Recommended Fasten Force: 470 - 635N•cm). Bracket hole should be under φ 8.5 mm.
• X554UN/X554UNS: NEC strongly recommends using size M6 screws (10-14 mm + thickness of bracket and washer in length). If using screws longer than 10-14 mm, check the depth of the hole. (Recommended Fasten Force: 470 - 635N•cm). Bracket hole should be under φ 8.5 mm.
• Prior to mounting, inspect the installation location to insure that it is strong enough to support the weight of the unit so that the unit will be safe from harm.
• Refer to the instructions included with the mounting equipment for detailed information.
• Make sure there is no gap between the monitor and the bracket.
• When used in a video wall configuration for a longer time, slight expansion of the displays may happen due to temperature changes. Due to this it is recommended that a one millimeter gap is kept between adjacent display edges.

Orientation
• When using the display in the portrait position, the monitor should be rotated clockwise so that the left side is moved to the top, right side is moved to the bottom. This will allow for proper ventilation and will extend the lifetime of the monitor. Improper ventilation may shorten the lifetime of the monitor.

Mounting location
• The ceiling and wall must be strong enough to support the monitor and mounting accessories.
• DO NOT install in locations where a door or gate can hit the unit.
• DO NOT install in areas where the unit will be subjected to strong vibrations and dust.
• DO NOT install near where the main power supply enters the building.
• Do not install in where people can easily grab and hang onto the unit or the mounting apparatus.
• When mounting in a recessed area, as in a wall, leave at least 4 inches (100 mm) of space between the monitor and the wall for proper ventilation.
• Allow adequate ventilation or provide air conditioning around the monitor, so that heat can properly dissipate away from the unit and mounting apparatus.

Mounting on ceiling
• Ensure that the ceiling is sturdy enough to support the weight of the unit and the mounting apparatus over time, against earthquakes, unexpected vibrations, and other external forces.
• Be sure the unit is mounted to a solid structure within the ceiling, such as a support beam. Secure the monitor using bolts, spring lock washers, washer and nut.
• DO NOT mount to areas that have no supporting internal structure. DO NOT use wood screws or anchor screws for mounting. DO NOT mount the unit to trim or to hanging fixtures.

Maintenance
• Periodically check for loose screws, gaps, distortions, or other problems that may occur with the mounting apparatus. If a problem is detected, please refer to qualified personnel for service.
• Regularly check the mounting location for signs of damage or weakness that may occur over time.
Attaching Mounting Accessories

The monitor is designed for use with the VESA mounting system. Use WM-46UN-L2 or WM-46UN-P for X464UN/X464UNV, WM-55UN-L or WM-55UN-P for X554UN/X554UNS.

1. Attach Mounting Accessories

Be careful to avoid tipping monitor when attaching accessories.

For NEC mounting accessory only

VESA Mounting Interface (M6)

Mounting accessories can be attached with the monitor in the face down position. To avoid damaging the screen face, place the protective sheet on the table underneath the LCD. The protective sheet was wrapped around the LCD in the original packaging. Make sure there is nothing on the table that can damage the monitor.

When using mounting accessories other than NEC compliant and approved, they must comply with the VESA-compatible mounting method.

2. Using Option Board

1. Turn off the main power switch.
2. Remove the handle.*1
3. Remove the attached slot cover by unscrewing the installed screws (Figure 1).
4. Insert option board in to the monitor. Attach the slot cover by using the removed screws.
5. Attach the handle.*1

NOTE: Please contact your supplier for available option boards. Do not apply excessive force to manipulate the optional board before fixing it with screws.

3. Installing and removing optional table top stand

CAUTION: Installing and removing the stand must be done by two or more people.

To install, follow those instructions included with the stand or mounting apparatus. Use only those devices recommended by the manufacturer.

NOTE: For X464UN/X464UNV, use ONLY thumbscrews which are included with the optional table top stand. For X554UN/X554UNS, use ONLY thumbscrews which are included in the monitor.

When installing the LCD monitor stand, handle the unit with care to avoid pinching your fingers.

NOTE: Install the stand so the long end of the feet face forward. Use the ST-322 for the X464UN/X464UNV and the ST-5220 for the X554UN/X554UNS.

4. Ventilation Requirements

When mounting in an enclosed space or recessed area, leave adequate room between the monitor and the enclosure to allow heat to disperse, as shown below.

Allow adequate ventilation or provide air conditioning around the monitor, so that heat can properly dissipate away from the unit and mounting apparatus; especially when you use monitors in multiple screen.
**5. Prevent Tipping**

When using the display with the optional table top stand fasten the LCD to a wall using a cord or chain that can support the weight of the monitor in order to prevent the monitor from falling. Fasten the cord or chain to the monitor using the provided clamps and screws. For the X464UN/X464UNV, the clamps and screws are included with the optional table top stand.

Before attaching the LCD monitor to the wall, make sure that the wall can support the weight of the monitor.

Be sure to remove the cord or chain from the wall before moving the LCD.
Parts Name and Functions

Control Panel

1. POWER button (\( \text{\textcircled{\textbf{1}}} \) )
   Switches the power on/off. See also page 16.

2. MUTE button (MUTE)
   Switches the audio mute ON/OFF.

3. INPUT button (INPUT)
   Acts as SET/POINT ZOOM button within OSD menu.
   (Toggle switches between [DVI], [DPORT], [HDMI], [VGA] or
   [Y/Pb/Pr], [SCART]*, [VIDEO]*, [S-VIDEO]*, [DPORT2]*, [DPORT3]*, [HDMI2]*, [RGB/HV]* or [Y/Pb/Pr2]*). These are
   available input only, shown as their factory preset name.

4. PLUS button (+)
   Acts as (+) button to increase the adjustment with OSD menu.
   Increases the audio output level when the OSD menu is
   turned off.

5. MINUS button (-)
   Acts as (-) button to decrease the adjustment with OSD menu.
   Decreases the audio output level when the OSD menu is
   turned off.

6. UP button (\( \text{\textcircled{\textbf{6}}} \) )
   Activates the OSD menu when the OSD menu is turned-off.
   Acts as \( \text{\textbullet{\textbf{\textcircled{\textup{\textup{\uparrow}}}}}} \) button to move the highlighted area up to select
   adjustment items within OSD menu.

7. DOWN button (\( \text{\textcircled{\textbf{7}}} \))
   Activates the OSD menu when the OSD menu is turned-off.
   Acts as \( \text{\textcircled{\textbf{\textup{\textdownarrow}}}} \) button to move the highlighted area down to select
   adjustment items within OSD menu.

8. EXIT button (EXIT)
   Activates the OSD menu when the OSD menu is turned-off.
   Acts as EXIT button within the OSD to move to previous
   menu.

9. Remote control sensor and Power Indicator
   Receives the signal from the remote control (when using the
   wireless remote control). See also page 11.
   Glows green when the LCD monitor is in active mode*.
   Glows red when the LCD is in POWER OFF mode.
   Glows amber when the monitor is in Power Save Mode.
   Green and Amber blink alternately while in Power Standby
   mode with the “SCHEDULE SETTINGS” function enabled.
   When a component failure is detected within the monitor, the
   indicator will blink red.
   * If “OFF” is selected in “POWER INDICATOR” (see page 25),
   LED will not light when the LCD monitor is in active mode.

Control Key Lock Mode
   This control completely locks out access to all Control Key
   functions. To activate the control key lock function, press
   both \( \text{\textcircled{\textbf{\textbf{\textdownarrow}}}} \) and \( \text{\textcircled{\textbf{\textup{\textup{\uparrow}}}} \) and hold down simultaneously for more than
   3 seconds. To resume user mode, press both \( \text{\textcircled{\textbf{\textdownarrow}} \) and \( \text{\textcircled{\textbf{\textup{\textup{\uparrow}}}} \) and
   hold simultaneously for more than 3 seconds.

*: This function depends on which option board you use.
### Terminal Panel

1. **AC IN connector**
   Connects with the supplied power cord.

2. **Main Power Switch**
   On/Off switch to turn main power ON/OFF.

3. **EXTERNAL SPEAKER TERMINAL**
   To output the audio signal from AUDIO 1, DPORT and HDMI.
   Red terminal is plus (+).
   Black terminal is minus (-).
   **NOTE:** This speaker terminal is for 15 W + 15 W (8 ohm) speaker.

4. **AUDIO OUT**
   To output the audio signal from the AUDIO IN 1, 2, DPORT and HDMI to an external device (stereo receiver, amplifier, etc.).

5. **Service port**
   This USB slot is for future software upgrades.

6. **LAN port (RJ-45)**
   LAN connection. See page 31 and 34.
   **NOTE:** Please give priority for use to LAN1.

7. **AUDIO IN 1, 2**
   To input audio signal from external equipment such as a computer or DVD player.

8. **RS-232C (D-Sub 9 pin)**
   Connect to RS-232C input from external equipment such as a PC in order to control RS-232C functions.

9. **REMOTE IN**
   Use the optional wired remote control by connecting it to your monitor.
   **NOTE:** Do not use this connector unless specified.

10. **VGA IN (mini D-Sub 15 pin)**
    To input analog RGB signals from a personal computer or from other RGB equipment. This input can be used with an RGB or COMPONENT source. Please select signal type in TERMINAL SETTING. See page 27.
    **NOTE:** When you use this connector for COMPONENT, please use a suitable signal cable. If you have any questions, please ask your dealer.

11. **DisplayPort connectors**
    **IN connector:** To input DisplayPort signals.
    **OUT connector:** To output signal which is displayed. See page 25 VIDEO OUT SETTING.
    To output signal which is displayed as a main picture when selected PIP mode. See page 11.

12. **HDMI IN**
    To input digital HDMI signals.

13. **DVI IN (DVI-D)**
    To input digital RGB signals from a computer or HDTV device having a digital RGB output.
    * This connector does not support analog input.

14. **Option board slot**
    Slot 2 and slot 3 type accessories are available. Please contact your supplier for detailed information.
    **NOTE:** Please contact your supplier for available option board.

15. **Remote control sensor, AMBIENT LIGHT SENSOR and HUMAN SENSOR**
    Receives the signal from the Remote control.
    Detects the level of ambient light, allowing the monitor to make automatic adjustments to the brightness setting, resulting in a more comfortable viewing experience.
    Do not cover this sensor. See page 19.
    Detects human presence in front of the monitor. See page 45.

16. **Kensington Lock**
    For security and theft prevention.

17. **Intelligent wireless data sensor**
    Sensor for wireless communication of the monitor information and settings.
Wireless Remote Control (Optional)

1. **POWER button**
   Switches the power on/standby.

2. **INPUT button**
   Selects input signal.
   - DVI: DVI
   - HDMI: HDMI, HDMI2
   - DisplayPort: DPORT, DPORT2, DPORT3
   - VGA: VGA
   - Y/Pb/Pr: Y/Pb/Pr, SCART, Y/Pb/Pr2
   - RGB/HV: RGB/HV
   - VIDEO: VIDEO, S-VIDEO
   - OPTION: Depends on your connection

3. **PICTURE MODE button**
   Selects picture mode, [HIGHLIGHT], [STANDARD], [sRGB], [CINEMA], [CUSTOM1], [CUSTOM2]. See page 18.
   - HIGHLIGHT: for moving images such as DVD.
   - STANDARD: for images.
   - sRGB: for text based images.
   - CINEMA: for movies.
   - CUSTOM1 and CUSTOM2: activate auto dimming function. See page 28.

4. **ASPECT button**
   Selects picture aspect, [FULL], [WIDE], [DYNAMIC], [1:1], [ZOOM] and [NORMAL]. See page 17.

5. **AUDIO INPUT button**
   Selects audio input source [IN1], [IN2], [IN3]*2, [OPTION]*2, [HDMI], [DPORT], [HDMI2]*2, [DPORT2]*2, [DPORT3]*2.

6. **OPTION MENU button**

7. **KEYPAD**
   Press buttons to set and change passwords, change channel and set REMOTE ID.

8. **ENT button**

9. **DISPLAY button**
   Turns on/off the information OSD. See page 18.

10. **MENU button**
    Turns on/off the menu mode.

11. **AUTO SET UP button**
    Enters auto setup menu. See page 20.

12. **EXIT button**
    Returns to previous menu within OSD menu.

13. **UP/DOWN button (△/▼)**
    Acts as ▲▼ button to move the highlighted area up or down to select adjustment items within OSD menu.
    Small screen which adjusted “PIP” mode moves up or down.

14. **MINUS/PLUS (-/+) button**
    Increases or decreases the adjustment level within OSD menu settings.
    Small screen which adjusted “PIP” mode moves left or right and increases or decreases the size.

15. **SET/POINT ZOOM button**
    Makes selection. Activates POINT ZOOM function when OSD menu is not shown.

16. **VOLUME UP/DOWN button (VOL +/-)**
    Increases or decreases audio output level.

17. **CH/ZOOM UP/DOWN button (CH/ZOOM +/-)**
    Increases or decreases POINT ZOOM level.

18. **GUIDE button**

19. **MUTE button**
    Turns on/off mute function.

20. **STILL button**
    ON/OFF button: Activates/deactivates still picture mode.
    STILL CAPTURE button: Captures still picture.
    NOTE: This function is released when activating IMAGE FLIP.

21. **IMAGE FLIP button**
    Toggle switches between H FLIP, V FLIP, 180° ROTATE and NONE. See page 21.
Operating Range for the Optional Remote Control

Point the top of the remote control toward the sensor unit’s remote control sensor in optional control kit during button operation.

Use the remote control within a distance of about 7 m (23 ft.) from remote control sensor or at a horizontal and vertical angle of within 30° within a distance of about 3.5 m (10 ft.).

Caution: Important, the remote control system may not function when direct sunlight or strong illumination strikes the remote control sensor or when there is an object in the path.

Handling the remote control

- Do not subject to strong shock.
- Do not allow water or other liquid to splash the remote control. If the remote control gets wet, wipe it dry immediately.
- Avoid exposure to heat and steam.
- Other than to install the batteries, do not open the remote control.

*1: When VIDEO OUT SETTING is ON, DPORT cannot be selected as the sub picture.
*2: This function depends on which option board you use. Refer to the option board’s manual for further information.

*3: *3: When VIDEO OUT SETTING is ON, DPORT cannot be selected as the sub picture.

*4: If VGA or Y/Pb/Pr is selected as the main picture, DP out is disabled even when VIDEO OUT SETTING is ON.

*5: DP out can output signal only when VIDEO OUT SETTING is ON.
1. Determine the installation location

CAUTION: Installing your LCD monitor must be done by a qualified technician. Contact your dealer for more information.

CAUTION: MOVING OR INSTALLING THE LCD MONITOR MUST BE DONE BY TWO OR MORE PEOPLE. Failure to follow this caution may result in injury if the LCD monitor falls.

CAUTION: Do not mount or operate the monitor upside down, face up or face down.

CAUTION: This LCD has a temperature sensor and cooling fan, including a fan for the option board. If the LCD becomes too hot, the cooling fan will turn on automatically. The option board's fan is active although the temperature is lower than normal operating temperature for cooling the option board. If the LCD becomes overheated while the cooling fan is running, a “Caution” warning will appear. If the “Caution” warning appears, discontinue use and allow the unit to cool. Using the cooling fan will reduce the likelihood of early circuit failure and may help reduce image degradation and “Image Persistence”.

If the LCD is used in an enclosed area or if the LCD panel is covered with a protective screen, please check the inside temperature of the monitor by using the “HEAT STATUS” control in the OSD (see page 25). If the temperature is higher than the normal operating temperature, please turn the cooling fan to ON within the FAN CONTROL menu within the OSD (see page 25).

IMPORTANT: Lay the protective sheet, which was wrapped around the LCD monitor when it was packaged, beneath the LCD monitor so as not to scratch the panel.

2. Install the remote control (Optional) batteries

The remote control is powered by two 1.5V AAA batteries. To install or replace batteries:

A. Press and slide to open the cover.
B. Align the batteries according to the (+) and (–) indications inside the case.
C. Replace the cover.

CAUTION: Incorrect usage of batteries can result in leaks or bursting.

NEC recommends the following battery use:

- Place “AAA” size batteries matching the (+) and (-) signs on each battery to the (+) and (-) signs of the battery compartment.
- Do not mix battery brands.
- Do not combine new and old batteries. This can shorten battery life or cause liquid leakage of batteries.
- Remove dead batteries immediately to prevent battery acid from leaking into the battery compartment.
- Do not touch exposed battery acid, it may injure skin.

NOTE: If you do not intend to use the Remote Control for a long period of time, remove the batteries.

3. Connect external equipment (See pages 14 and 15)

- To protect the external equipment; turn off the main power before making connections.
- Refer to your equipment user manual for further information.

NOTE: Do not connect/disconnect cables when turning on the monitor or other external equipment as this may result in a loss of the monitor image.

4. Connect the supplied power cord

- The equipment should be installed close to an easily accessible power outlet.
- Please fasten power cord to the LCD monitor by attaching the screw and clamp.
- Fully insert the prongs into the power outlet socket. A loose connection may cause image degradation.

NOTE: Please refer to the “Safety Precautions and Maintenance” section of this manual for proper selection of AC power cord.
5. Switch on the power of all the attached external equipment
When connected with a computer, switch on the power of the computer first.

6. Operate the attached external equipment
Display the signal from the desired input source.

7. Adjust the sound
Make volume adjustments when required.

8. Adjust the screen (See pages 20 and 21)
Make adjustments of the screen display position when necessary.

9. Adjust the image (See page 20)
Make adjustments such as backlight or contrast when required.

10. Recommended Adjustments
To reduce the risk of the "Image Persistence", please adjust the following items based on the application being used:
"SCREEN SAVER", "SIDE BORDER COLOR" (See page 25)
"DATE & TIME", "SCHEDULE SETTINGS" (See page 22).
It is recommended that the "FAN CONTROL" setting (See page 25) be turned to ON also.
Connections

NOTE: Do not connect/disconnect cables when turning on the monitor or other external equipment as this may result in a loss of the monitor image.

NOTE: Use an audio cable without a built-in resistor. Using an audio cable with a built-in resistor turns down the sound.

Before making connections:
* First turn off the power of all the attached equipment and make connections.
* Refer to the user manual included with each separate piece of equipment.

Wiring Diagram

* Multiple monitors that are daisy-chained have a limit to the connectable monitors.

Connecting a Personal Computer

Connecting your computer to your LCD monitor will enable you to display your computer’s screen image. Some video cards may not display an image correctly. Your LCD monitor displays proper image by adjusting the factory preset timing signal automatically.

<Typical factory preset signal timing>

• If you use with a Macintosh PowerBook, set “Mirroring” to Off on your PowerBook.
  Refer to your Macintosh’s owner’s manual for more information about your computer’s video output requirements and any special identification or configuration your monitor’s image and monitor may require.
• Input TMDS signals conforming to DVI standards.
• To maintain display quality, use a cable that conforms to DVI standards.

Connecting a DVD Player or Computer with HDMI out

• Please use an HDMI cable with HDMI logo.
• It may take a moment for the signal to appear.
• Some video cards or drivers may not display an image correctly.
• When you use a computer with HDMI out, please set OVER SCAN to “OFF” (see page 27).

Connecting a Computer with DisplayPort

• Please use DisplayPort cable with DisplayPort compliance logo.
• It may take a moment for the signal to appear.
• Please note that when connecting a DisplayPort cable to a component with a signal conversion adapter, an image may not appear.
• Select DisplayPort cables feature a locking function. When removing this cable, hold down the top button to release the lock.
Basic Operation

Power ON and OFF Modes
The LCD monitor power indicator will turn green while powered on and will turn red or amber while powered off.

NOTE: The Main Power Switch must be in the ON position in order to power up the monitor using the remote control or the Power Button.
**Power Indicator**

<table>
<thead>
<tr>
<th>Mode</th>

<td>Red Blinking (See Troubleshooting page 46)</td>
</tr>
</tbody>
</table>

*1 If “OFF” is selected in POWER INDICATOR (page 25), the LED will not light when the LCD monitor is in active mode.

*2 Without any option, with factory settings.

**Using Power Management**

The LCD monitor follows the VESA approved DPM Display Power Management function. The power management function is an energy saving function that automatically reduces the power consumption of the display when the keyboard or the mouse has not been used for a fixed period.

The power management feature on your new display has been set to the “AUTO POWER SAVE” mode. This allows your display to enter a Power Saving Mode when no signal is applied. This could potentially increase the life and decrease the power consumption of the display.

**NOTE:** Depending on the PC and video card used, this function may not operate.

**NOTE:** The monitor automatically goes into OFF at the preset time period after signal is lost.

**Selecting a video source***4

**To view a video source:**

Use the input button to set [VIDEO], [S-VIDEO].

Use the COLOR SYSTEM menu to set [AUTO], [NTSC], [PAL], [SECAM], [PAL60], [4.43NTSC], according to your video format.

**Picture Aspect**

<table>
<thead>
<tr>
<th>Aspect ratio of image</th>

<td>DYNAMIC</td>
</tr>
<tr>
<td>Letterbox</td>
<td></td>
<td>FULL</td>
</tr>
<tr>
<td></td>
<td></td>
<td>WIDE</td>
</tr>
</tbody>
</table>

*1 Grey areas indicate unused portions of the screen.

**NORMAL:** Displays the aspect ratio the same as it is sent from the source.

**FULL:** Fills entire screen.

**WIDE:** Expands a 16:9 letter box signal to fill entire screen.

**DYNAMIC:** Expands a 4:3 pictures to fill the entire screen with non-linearity. Some of the outside image area will be cut off due to expansion.

**1:1:** Displays the image in a 1 by 1 pixel format.

**ZOOM**

The image can be expanded beyond the active display area. The image which is outside of active display area is not shown.

*4: This function depends on which option board you use.
Information OSD
The Information OSD provides information such as: Input Source, Picture Size, etc. Press the DISPLAY button on the remote to bring up the Information OSD.

Picture Mode

</tbody>
</table>
**IR LOCK SETTINGS**

Prevents the monitor from being controlled by the wireless remote control. When ACTIVATE is selected, all the settings are activated. NOTE: IR LOCK SETTINGS is a function intended only to the wireless remote control buttons. This function does not lock out access to all buttons at the back of the monitor. To return to normal operation, press the "DISPLAY" button on the remote control for 5 seconds.

**MODE SELECT**

Selects the mode UNLOCK, ALL LOCK or CUSTOM LOCK.

**UNLOCK**

All buttons on the remote control are available for normal operations.

**ALL LOCK**

Locks all remote control buttons.

**CUSTOM LOCK**

Selects which buttons to be locked from POWER, VOLUME, and INPUT button. Except for CUSTOM LOCK settings, other buttons on the remote control are locked.

- **POWER**: When LOCK is selected, POWER button is locked.
- **VOLUME**: When UNLOCK is selected, sets minimum and maximum volume between VOL.0 to VOL.100. VOLUME (+) button and VOLUME (-) buttons are only available from the minimum volume to the maximum volume you set. When LOCK is selected, VOLUME (+) button and VOLUME (-) buttons are locked.
- **INPUT**: When UNLOCK is selected, choose up to three buttons from DVI, DisplayPort, VGA, HDMI, Y/Pb/Pr, VIDEO*, S-VIDEO*, OPTION* which you prefer to be unlocked. The unselected buttons are locked. When LOCK is selected, all INPUT buttons are locked.

**TILE MATRIX**

Allows one image to be expanded and displayed over multiple screens (up to 100) through a distribution amplifier. NOTE: Low resolution is not suitable for tiling to a large number of monitors. You can operate without a distribution amplifier at a lower number of screens. This function is released when selecting IMAGE FLIP except for NONE. When "DYNAMIC" or "ZOOM" is selected in ASPECT while executing TILE MATRIX, the setting will be applied after completing of TILE MATRIX.

**H MONITORS**

Number of monitors arranged horizontally. 1

**V MONITORS**

Number of monitors arranged vertically. 1

**POSITION**

Select which section of the tiled image to be displayed on the monitor. 1

**TILE COMP**

Turns the TILE COMP feature on. NO

**TILE MATRIX ENABLE**

Enables Tile Matrix. NO

**FRAME COMP**

Sets the tiled image timing to be displayed on the monitor. Large numbers make large influence to displayed image. NOTE: If FRAME COMP is set to AUTO or MANUAL, V SCAN REVERSE is not available. The image may be distorted when turning the power on or changing the settings.

**V SCAN REVERSE*2**

Reverse scanning image direction. Normal scanning direction is top to bottom. NOTE: If V SCAN REVERSE is set to AUTO or MANUAL, FRAME COMP is not available.

**TILE MATRIX MEM**

When "INPUT" is selected, TILE MATRIX setting is applied to each signal input. COMMON

**AUTO TILE MATRIX SETUP**

Allows auto setting of multiple screens by inputting the number of monitors arranged horizontally and vertically on the primary monitor. Following settings are set automatically: MONITOR ID, TILE MATRIX, TILE MATRIX MEM, Input Signal, VIDEO OUT SETTING, DisplayPort in TERMINAL SETTING. NOTE: All monitors which follow in the chain with LAN should be ON. When executing this function while in standby mode or power save mode, "LAN POWER" should be set to ON. AUTO ID will be automatically executed. When you use this function, it is recommended that monitors are chained by DisplayPort cable.

Example of installation via LAN:

| **RESET**                      | Resets the following settings within the ADVANCED OPTION menu back to factory setting:  
   INPUT DETECT (except the priority of input signals), INPUT CHANGE (except for INPUT1 and INPUT2), TERMINAL SETTING, DEINTERLACE, COLOR SYSTEM, OVER SCAN, AUDIO in OPTION SETTING. | - |
| **ADVANCED OPTION2**           | Adjusts the backlight of the LCD automatically depending on the amount of ambient light. | - |
| **AUTO DIMMING**               | Adjusts the brightness level according to the input signal.  
   NOTE: Do not select this function when ROOM LIGHT SENSING is MODE1 or MODE2. | OFF |
| **ROOM LIGHT SENSING**         | The backlight of the LCD screen can be set to increase or decrease depending on the amount of ambient light within the room. If the room is bright, the monitor becomes correspondingly bright. If the room is dim, then the monitor will dim accordingly. The purpose of this function is to make the viewing experience more comfortable to the eye in a variety of lighting conditions.  
   NOTE: When ROOM LIGHT SENSING is set to MODE1 or MODE2, BACKLIGHT, AUTO BRIGHTNESS and BACKLIGHT in SCREEN SAVER function are disabled.  
   AMBIENT parameter setting  
   ROOM LIGHT SENSING in OSD, select MODE1 or MODE2 and set MAX LIMIT, IN BRIGHT and IN DARK in each mode.  
   MAX LIMIT: This is the max level of backlight which you set.  
   IN BRIGHT: This is the backlight level that the monitor will go up to when the ambient light level is highest.  
   IN DARK: This is the level of backlight that the monitor will go down to when the ambient light level is low.  
   When the ROOM LIGHT SENSING is enabled the Backlight level of the screen changes automatically according to the lighting conditions of the room (see figure below). | OFF |
| **HUMAN SENSING**              | HUMAN SENSING has three settings.  
   NOTE: POWER SAVE is disabled when AUTO OFF or CUSTOM is selected in HUMAN SENSING. | DISABLE |
| DISABLE                        | No human sensing.                                                           | - |
| AUTO OFF                       | At the preset time, when no person is detected, BACKLIGHT and VOLUME automatically go into OFF. When a person comes near the monitor again, the monitor will automatically return to normal mode. | - |
| CUSTOM                         | BACKLIGHT and VOLUME automatically shift to the set value when detecting no person. When a person comes near the monitor again, the monitor automatically return to normal mode and display the input signal selected in INPUT SELECT. | - |
| **INTELLI. WIRELESS DATA**     | Select "ON" to activate INTELLIGENT WIRELESS DATA function (see page 44). A password is required when using the function. | ON |
| **RESET**                      | Resets "ADVANCED OPTION 2" settings back to factory setting, except for INTELLI. WIRELESS DATA. | - |
| **FACTORY RESET**              | Resets OSD options back to factory settings EXCEPT FOR: PICTURE MODE, VOLUME, SCHEDULE SETTINGS, DATE & TIME, DAYLIGHT SAVINGS, SUB INPUT in PIP, ASPECT in PIP, LANGUAGE, OSD ROTATION, MEMO, POWER ON DELAY, CHANGE PASSWORD, SECURITY, IP ADDRESS SETTING, LAN POWER, PING and LONG CABLE COMP. | - |

*1: This function depends on which option board you use.  
*2: The function is available only when connecting the optional control unit.
NOTE 1: CREATING A SCHEDULE
The schedule function allows the display to be set to power on and off at different times. Up to seven different schedules can be programmed.

To program the schedule:

1. Enter the SCHEDULE menu. Highlight SCHEDULE SETTINGS using the up and down buttons. Press the SET/POINT ZOOM or the + button to enter the Settings menu. Highlight the desired schedule number and press SET/POINT ZOOM. The box next to the number will turn yellow. The schedule can now be programmed.

2. Use the down button to highlight the hours setting in the ON time slot. Use the + and - buttons to set the hour. Use the up and down buttons to highlight the minutes setting. Use the + and - buttons to set the minutes. Set the OFF time in the same manner.

3. Use the up and down arrows to highlight INPUT. Use the + and - buttons to choose the input source. Use the up and down arrows to highlight PIC. MODE. Use the + and - buttons to choose the picture mode.

4. Use the down button to select a day on which the schedule will be enabled. Push the SET/POINT ZOOM button to enable. If the schedule is to be ran every day, choose EVERY DAY and press the SET/POINT ZOOM button. The circle next to EVERY DAY will turn yellow. If a weekly schedule is desired, choose the days of the week using the up and down buttons and pressing SET/POINT ZOOM to select. Then highlight the EVERY WEEK option and press SET/POINT ZOOM.

5. After a schedule is programmed the remaining schedules can then be set. Press MENU to leave the OSD or press EXIT to go back to the previous menu.

NOTE: If schedules are overlapping then the schedule with the highest number will have priority over the schedule with the lowest number. For example schedule #7 will have priority over schedule #1.

If selected input or picture mode is not available now, disable input or picture mode is shown in red.

NOTE 2: IMAGE PERSISTENCE
Please be aware that LCD Technology may experience a phenomenon known as Image Persistence. Image Persistence occurs when a residual or “ghost” image of a previous image remains visible on the screen. Unlike CRT monitors, LCD monitors’ image persistence is not permanent, but constant images being displayed for a long period of time should be avoided.

To alleviate image persistence, turn off the monitor for as long as the previous image was displayed. For example, if an image was on the monitor for one hour and a residual image remains, the monitor should be turned off for one hour to erase the image.

As with all personal display devices, NEC DISPLAY SOLUTIONS recommends displaying moving images and using a moving screen saver at regular intervals whenever the screen is idle or turning off the monitor when not in use.

Please set “SCREEN SAVER”, “DATE &TIME” and “SCHEDULE SETTINGS” functions to further reduce the risk of Image persistence.

For long life use as Public Display

Image Sticking of LCD Panel
When an LCD panel is operated continuously for long hours, a trace of electric charge remains near the electrode inside LCD, and residual or “ghost” image of previous image may be observed. (Image Persistence)

Image Persistence is not permanent, but when fixed image is displayed for long period, ionic impurities inside LCD are accumulated along the displayed image, and may be permanent. (Image Sticking)

Recommendations
To prevent Image Sticking, and for longer life usage of LCD, the following are recommended.

1. Fixed image should not be displayed for long period. Change fixed images after short intervals.

2. When not in use, please turn off the monitor by remote control, or use Power Management or use Schedule Functions.

3. Lower environmental temperatures prolong the lifespan of the monitor.
When Protective surface (glass, acrylic) is installed over the LCD surface, the LCD surface is located in an enclosed space, the monitor are stacked, utilize the temperature sensors inside monitor.
To reduce the environmental temperature, use the Cooling Fan, Screen Saver and Low Brightness.

4. Please use “Screen Saver Mode” of monitor.
REMOTE CONTROL ID FUNCTION

REMOTE CONTROL ID
The optional remote control can be used to control up to 100 individual MultiSync monitors using what is called the REMOTE CONTROL ID mode. The REMOTE CONTROL ID mode works in conjunction with the Monitor ID, allowing control of up to 100 individual MultiSync monitors. For example: if there are many monitors being used in the same area, a remote control in normal mode would send signals to every monitor at the same time (see Figure 1). Using the remote in REMOTE CONTROL ID mode will only operate one specific monitor in the group (see Figure 2).

TO SET REMOTE CONTROL ID
While holding down the REMOTE ID SET button on the remote control, use the KEYPAD to input the Monitor ID (1-100) of the display to be controlled via remote. The remote can then be used to operate the monitor having that specific Monitor ID number. When 0 is selected or when the remote control is in normal mode, all monitors will be operated.

TO SET/RESET REMOTE CONTROL MODE
ID Mode - To enter ID Mode press the REMOTE ID SET button and hold down for 2 seconds.
Normal Mode - To return to Normal Mode press the REMOTE ID CLEAR button and hold down for 2 seconds.

In order for this feature to work properly, the display must be assigned a Monitor ID number. The Monitor ID number can be assigned under the MULTI DISPLAY menu in the OSD (See page 23).

Point the remote control towards the remote sensor of the desired monitor and press the REMOTE ID SET button. The MONITOR ID number is shown on the display when your remote control is in ID mode.

Use the remote control to operate a monitor that has a specific MONITOR ID number assigned to it.

1. Set the MONITOR ID number for the display (See page 23). The MONITOR ID number can range from 1-100. This MONITOR ID number allows the remote control to operate this specific monitor without affecting other monitors.
2. On the remote control, press and hold down the REMOTE ID SET button while using the keypad to input the REMOTE CONTROL ID number (1-100). The REMOTE ID NUMBER should match the MONITOR ID number of the display to be controlled. Choose “0” to simultaneously control all displays in range.
3. Point the remote control towards the remote sensor of the desired monitor and press the REMOTE ID SET button. The MONITOR ID number is shown in red on the display.

NOTE: GROUP ID cannot be specified via the remote control.
Multiple Monitors Connection

You can control multiple monitors by using RS-232C, REMOTE IN or LAN daisy-chain connection.

**NOTE:** Multiple monitors that are daisy-chained have a limit to the connectable monitors. When manually specify the ID number or control by the specified ID number, please execute AUTO ID (see page 23) previously.

**Connection**
Controlling the LCD monitor via RS-232C Remote Control

This LCD monitor can be controlled by connecting a personal computer with a RS-232C terminal.

Functions that can be controlled by a personal computer are:

- Power ON or OFF.
- Switching between input signals.
- Sound Mute ON or OFF.

Connection

LCD Monitor + PC

NOTE: If your PC is equipped only with a 25-pin serial port connector, a 25-pin serial port adapter is required. Contact your dealer for details.

For the pin assignment, please see page 49 “2) RS-232C input/output”.

To control a monitor, please use the control command. Instructions for the control command can be found on the CD included with the display. The file is called “External_control.pdf”.

</table>
Connecting to a Network
Using a LAN cable allows you to specify the Network Settings and the Alert Mail Settings by using an HTTP server function.
To use a LAN connection, you are required to assign an IP address.

Example of LAN connection:

![LAN connection diagram]

NOTE: Use a category 5 or higher LAN cable.

Network Setting by Using an HTTP Browser
Overview
Connecting the monitor to a network allows for monitor control from a computer via the network.
To perform the monitor control from a web browser, you must have an exclusive application installed on your computer.
The IP address and subnet mask of the monitor can be set on the Network Setting screen of the web browser by using an HTTP server function. Please be sure to use “Microsoft Internet Explorer 7.0” or a higher version for the web browser. (This device uses “JavaScript” and “Cookies” and the browser should be set to accept these functions. The setting method will vary depending on the version of browser. Please refer to the help files and the other information provided in your software.)
Access is gained to the HTTP server function by starting the Web browser on the computer via the network connected to the monitor and entering the following URL.

Network Setting
http://<the Monitor's IP address>/index.html

TIP: The default IP address is assigned automatically to the monitor.
The exclusive application can be downloaded from our website.

NOTE: If the MONITOR NETWORK SETTINGS screen does not appear in the web browser, press the Ctrl+F5 keys to refresh your web browser (or clear the cache).

The display or button's response can be slowed down or operation may not be accepted depending the settings of your network. Should this happen, consult your network administrator.
The LCD monitor may not respond if its buttons are repeatedly pressed in rapid intervals. Should this happen, wait a moment and repeat. If you still can't get a response, turn the monitor off and then back on.

To control a monitor please use the control command. See "Control command diagram" (page 33).
Preparation Before Use

Connect the monitor to a commercially available LAN cable before engaging in browser operations.

Operation with a browser that uses a proxy server may not be possible depending on the type of proxy server and the setting method. Although the type of proxy server will be a factor, it is possible that items that have actually been set will not be displayed depending on the effectiveness of the cache, and the contents set from the browser may not be reflected in operation. It is recommended that a proxy server not be used unless it is unavailable.

Handling of the Address for Operation via a Browser

The host name can be used under the following cases:

If the host name corresponding to the IP address of the monitor has been registered to the domain name server (DNS) by the network administrator, you can then access the network settings of the display via that registered host name using a compatible browser.

If the host name corresponding to the IP address of the monitor has been configured in the "HOSTS" file of the computer being used, you can then access the network settings of the display via that host name using a compatible browser.

Example 1: When the host name of the monitor has been set to "pd.nec.co.jp", access is gained to the network setting by specifying http://pd.nec.co.jp/index.html for the address or the entry column of the URL.

Example 2: When the IP address of the monitor is "192.168.73.1", access is gained to the mail alert settings by specifying http://192.168.73.1/index.html for the address or the entry column of the URL.

Operation

Access the following address to show HOME. Click each link on the left side of HOME.

http://<the Monitor's IP address>/index.html

REMOTE CONTROL

Enable to control equivalent as the remote control key.

OSD menu

Enable to set the following OSD menu.

PICTURE, ADJUST, AUDIO, SCHEDULE, PIP, OSD, MULTI DISPLAY, DISPLAY PROTECTION, EXTERNAL CONTROL, ADVANCED OPTION1, ADVANCED OPTION2.

NOTE:

Function of buttons which are shown on setting pages.

[APPLY]: Reflect your settings.
[CANCEL]: Return to the previous settings. **NOTE**: CANCEL is disabled after clicking APPLY.
[RELOAD]: Reload the settings.
[RESET]: Resets to the initial setting.
Network Setting
Click “NETWORK” on the left side of HOME.

**IP SETTING**
- Set for IP ADDRESS setting.
  - AUTO: Automatically assign an IP address.
  - MANUAL: Set your IP address of the network connected to the monitor.
  - NOTE: Consult your network administrator for the IP address when [AUTO] is selected for [IP SETTING].

**IP ADDRESS**
- Set your IP address of the network connected to the monitor when [MANUAL] is selected for [IP SETTING].

**SUBNET MASK**
- Set your subnet mask number of the network connected to the monitor when [MANUAL] is selected for [IP SETTING].

**DEFAULT GATEWAY**
- Set your default gateway of the network connected to the monitor when [MANUAL] is selected for [IP SETTING].
  - NOTE: Set as [0.0.0.0] to delete the setting.

**DNS**
- Set for IP ADDRESS setting of DNS server.
  - AUTO: Automatically assign an IP address of DNS server connected to the monitor.
  - MANUAL: Set your IP address of DNS server connected to the monitor.

**PRIMARY DNS**
- Set your primary DNS settings of the network connected to the monitor.
  - NOTE: Set as [0.0.0.0] to delete the setting.

**SECONDARY DNS**
- Set your secondary DNS settings of the network connected to the monitor.
  - NOTE: Set as [0.0.0.0] to delete the setting.

**NOTE:** The following settings will reset back to the factory setting when “IP ADDRESS RESET” is selected by an EXTERNAL CONTROL of OSD:
  - [IP SETTING]: AUTO, [IP ADDRESS]: 192.168.0.10, [SUBNET MASK]: 255.255.255.0, [DNS]: AUTO [DEFAULT GATEWAY], [PRIMARY DNS] and [SECONDARY DNS] are blank.
Mail Setting
Click “MAIL” on the left side of HOME.

This option notifies your computer of an error message via e-mail when using wired LAN. An error message notification will be sent when an error occurs in the monitor.

English-38
SNMP Setting

Click “SNMP” on the left side of HOME.

This function allows for getting status and controlling of a monitor via the network.

Version:
SNMP v1  Authenticated plaintext by community name, not return a confirmation message of Trap.
SNMP v2c  Authenticated plaintext by community name, return a confirmation message of Trap.

Community name:
The default setting of community name is “public”. It is read only. You can set community names for up to 3 settings.

Trap:
Sending error message to specified address when an error occurs in the monitor.

**AMX Setting**

Click “AMX” on the left side of HOME.

**AMX BEACON**

Turn on or off for detection from AMX Device Discovery when connecting to the network supported by AMX’s NetLinx control system.

**TIP:**
When using a device that supports AMX Device Discovery, all AMX NetLinx control system will recognize the device and download the appropriate Device Discovery Module from an AMX server. Checking [ENABLE] will detect the device from AMX Device Discovery. Checking [DISABLE] will not detect the device from AMX Device Discovery.

---

**CRESTRON Setting**

Click “CRESTRON” on the left side of HOME.

**CRESTRON ROOMVIEW compatibility**

The monitor supports CRESTRON ROOMVIEW, allowing multiple devices connected in the network to be managed and controlled from a computer or a controller.

For more information, visit [http://www.crestron.com](http://www.crestron.com)

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ROOMVIEW</td>
<td>ROOMVIEW for managing from the computer. ON: Enables ROOMVIEW. OFF: Disables ROOMVIEW.</td>
</tr>
<tr>
<td>CRESTRON CONTROL</td>
<td>CRESTRON CONTROL for managing from the controller. ON: Enables CRESTRON CONTROL. OFF: Disables CRESTRON CONTROL.</td>
</tr>
<tr>
<td>CONTROLLER IP ADDRESS</td>
<td>Set your IP address of CRESTRON SERVER.</td>
</tr>
<tr>
<td>IP ID</td>
<td>Set your IP ID of CRESTRON SERVER.</td>
</tr>
</tbody>
</table>

**TIP:** The CRESTRON settings are required only for use with CRESTRON ROOMVIEW.
For more information, visit [http://www.crestron.com](http://www.crestron.com)
**Name Setting**

Click “NAME” on the left side of HOME.

Set a monitor name. The name must be 16 characters or less. The default is model name.

**Network Password Setting**

Click “NETWORK PASSWORD” on the left side of HOME.

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>PJLink PASSWORD</td>
<td>Set a password for PJLink*. A password must be 32 characters or less. Do not forget your password. However, if you forget your password, consult with your dealer.</td>
</tr>

<td>Set a password for HTTP server. A password must be 10 characters or less.</td>
</tr>
<tr>
<td>HTTP PASSWORD ENABLE</td>
<td>HTTP PASSWORD is required when logging in HTTP server. Set a monitor name as USER NAME when inputting the password.</td>
</tr>
</tbody>
</table>

*What is PJLink?*

PJLink is a standardization of protocol used for controlling devices of different manufacturers. This standard protocol is established by Japan Business Machine and Information System Industries Association (JBMIA) in 2005. The device supports all the commands of PJLink Class 1. Setting of PJLink will not be affected even when [RESET] is done from the menu.
**PD List Information**

Click “PD LIST” on the left side of HOME.

Show the list of ID and IP address of multiple monitors that are daisy-chained. Only the master monitor can show the list.

**Memo Setting**

Click “MEMO” on the left side of HOME.

**Memo Setting**

Click “MEMO” on the left side of HOME.

Set a title and message.

<table>
<thead>
<tr>
<th>TITLE</th>
<th>A title must be 24 characters or less.</th>
</tr>
</thead>
<tbody>
<tr>
<td>MESSAGE</td>
<td>A message must be 240 characters or less.</td>
</tr>
<tr>
<td>MEMO PASSWORD</td>
<td>The default is “0000”.</td>
</tr>
<tr>
<td>MEMO PASSWORD ENABLE</td>
<td>MEMO PASSWORD is required when setting MEMO.</td>
</tr>
</tbody>
</table>
POINT ZOOM

Using “SET/POINT ZOOM” button on a remote control allows to enlarge a partial of image.
Press CH+/- button to zoom up or down. The image can be expanded from 1 to 10 times.
1 Press [SET/POINT ZOOM] button on a remote control. An icon will be a magnifier.
2 Move magnifier icon by [▲] [▼] [+][-] button.
3 Press [CH+] to zoom up. Press [CH-] to zoom down.
4 Press [SET/POINT ZOOM] to disappear the icon.
5 Press [EXIT] to return to a normal size.
6 Press [MENU] to display OSD menu.<Setting Procedure>

NOTE:
• The image may be distorted during this function.
• This function does not work when set to PIP, POP, PBP, TILE MATRIX, SCREEN SAVER, SUPER in INPUT CHANGE, IMAGE FLIP.
• When selected DYNAMIC or ZOOM in ASPECT, the image will be changed FULL, then start to POINT ZOOM. After POINT ZOOM, the ASPECT will be returned previous ASPECT settings. When the ASPECT is changed during POINT ZOOM, DYNAMIC and ZOOM will be FULL image.
• The magnifier icon does not move to no image area.
• POINT ZOOM will be released after changing input signal or power off.
• POINT ZOOM will be released when setting IMAGE FLIP or changing ASPECT setting during POINT ZOOM.

PROOF OF PLAY

This function allows to send message for the current status of monitor by self checking.

<table>
<thead>
<tr>

---

*English-44*
Ultra Narrow Bezel: Provides the optimum solution in a tiling environment.

Reduced Footprint: Provides the ideal solution for environments with superior image quality.

Color Control Systems: Allow you to adjust the colors on your screen and customize the color accuracy of your monitor to a variety of standards.

OmniColor: Combines Six-axis color control and the sRGB standard. Six-axis color control permits color adjustments via six axes (R, G, B, C, M and Y) rather than through the three axes (R, G and B) previously available. The sRGB standard provides the monitor with a uniform color profile. This assures that the colors displayed on the monitor are exactly the same as on the color printout (with sRGB supporting operating system and sRGB printer). This allows you to adjust the colors on your screen and customize the color accuracy of your monitor to a variety of standards.

sRGB Color Control: A new optimized color management standard which allows for color matching on computer displays and other peripherals. The sRGB standard, which is based on a calibrated color space, allows for optimal color representation and backward compatibility with other common color standards.

OSD (On-Screen-Display) Controls: Allow you to quickly and easily adjust all elements of your screen image via simple to use on-screen menus.

Plug and Play: The Microsoft® solution with the Windows® operating system facilitates setup and installation by allowing the monitor to send its capabilities (such as screen size and resolutions supported) directly to your computer, automatically optimizing display performance.

IPM (Intelligent Power Manager) System: Provides innovative power-saving methods that allow the monitor to shift to a lower power consumption level when on but not in use, saving two-thirds of your monitor energy costs, reducing emissions and lowering the air conditioning costs of the workplace.

FullScan Capability: Allows you to use the entire screen area in most resolutions, significantly expanding image size.

VESA Standard (FDMIv1) Mounting Interface: Allows you to connect your LCD monitor to any VESA standard (FDMIv1) third party mounting arm or bracket. NEC recommends using mounting interface that comply with TÜV-GS and/or UL1678 standard in North America.

DVI-D: The digital-only subset of DVI ratified by the Digital Display Working Group (DDWG) for digital connections between computers and displays. As a digital-only connector, analog support is not provided for a DVI-D connector. As a DVI-based digital only connection, only a simple adapter is necessary for compatibility between DVI-D and other DVI-based digital connectors such as DFP and P&D. The DVI interface of this display supports HDCP.

TILE MATRIX, TILE COMP: Shows one image over multiple screens with accuracy while compensating for bezel width.

ZOOM: Expands/reduces image size for horizontal and vertical direction.

Self-diagnosis: If an internal error should occur, a failure state will be indicated.

HDCP (High-bandwidth Digital Content Protection): HDCP is a system for preventing illegal copying of video data sent over a Digital Visual Interface (DVI). If you are unable to view material via the DVI input, this does not necessarily mean the display is not functioning properly. With the implementation of HDCP, there may be cases in which certain content is protected with HDCP and might not be displayed due to the decision/intention of the HDCP community (Digital Content Protection, LLC).

Option board slot: You can use an option board. Please contact your supplier for detailed information.
Troubleshooting

No picture
- The signal cable should be completely attached to the display card/computer.
- The display card should be completely seated in its slot.
- Check the main Power Switch, it should be in the ON position.
- Power Switch and computer power switch should be in the ON position.
- Check to make sure that a supported mode has been selected on the display card or system being used. (Please consult display card or system manual to change graphics mode.)
- Check the monitor and your display card with respect to compatibility and recommended settings.
- Check the signal cable connector for bent or pushed-in pins.
- The monitor automatically goes into OFF at the preset time period after signal is lost. Press the power button.

Power Button does not respond
- Unplug the power cord of the monitor from the AC outlet to turn off and reset the monitor.
- Check the main Power Switch on the back side of the monitor.

Image persistence
- Please be aware that LCD Technology may experience a phenomenon known as Image Persistence. Image Persistence occurs when a residual or "ghost" image of a previous image remains visible on the screen. Unlike CRT monitors, LCD monitors' image persistence is not permanent, but constant images being displayed for a long period of time should be avoided. To alleviate image persistence, turn off the monitor for as long as the previous image was displayed. For example, if an image was on the monitor for one hour and a residual image remains, the monitor should be turned off for one hour to erase the image.

NOTE: As with all personal display devices, NEC DISPLAY SOLUTIONS recommends displaying moving images and using a moving screen saver at regular intervals whenever the screen is idle or turning off the monitor when not in use.

Image is unstable, unfocused or swimming is apparent
- Signal cable should be completely attached to the computer.
- Use the OSD Image Adjust controls to focus and adjust display by increasing or decreasing the fine adjustment. When the display mode is changed, the OSD Image Adjust settings may need to be re-adjusted.
- Check the monitor and your display card with respect to compatibility and recommended signal timings.
- If your text is garbled, change the video mode to non-interlace and use 60Hz refresh rate.
- The image may be distorted when turning the power on or changing the settings.

Image of component signal is greenish
- Check to see if the Y/Pb/Pr input connector is selected.

LED on monitor is not lit (no green or red color can be seen)
- Power Switch should be in the ON position and power cord should be connected.
- Check the main Power Switch, it should be in the ON position.
- Make certain the computer is not in a power-saving mode (touch the keyboard or mouse).
- Check to see that the power indicator option in the OSD is set to ON.

RED LED on monitor is blinking
- A certain failure might have occurred, please contact your nearest authorized NEC DISPLAY SOLUTIONS service facility.
- If the monitor is powered off by the inside temperature being higher than the normal operating temperature, a RED LED will blink six times. Power on the display again after confirming the inside temperature has been reduced to normal operation temperature.

Display image is not sized properly
- Use the OSD Image Adjust controls to increase or decrease the coarse adjustment.
- Check to make sure that a supported mode has been selected on the display card or system being used. (Please consult display card or system manual to change graphics mode.)

Selected resolution is not displayed properly
- Use OSD Display Mode to enter Information menu and confirm that the appropriate resolution has been selected. If not, select corresponding option.

No Sound
- Check to see if audio cable is properly connected.
- Check to see if mute is activated.
- Check to see if volume is set at minimum.
- Check to see if the Remote Control is pointing at the monitor's remote sensor.
- Check if batteries are inserted correctly.
- Check if the Remote Control's batteries status.
- Check the IR LOCK SETTING status.
- Check to see if SURROUND is ON.

Remote Control is not available
- Check the Remote Control’s batteries status.
- Check if batteries are inserted correctly.
- Check if the Remote Control is pointing at the monitor’s remote sensor.
- Check the IR LOCK SETTING status.
- The remote control system may not function when direct sunlight or strong illumination strikes the remote control sensor of the LCD monitor, or when there is an object in the path.

“SCHEDULE”/“OFF TIMER” function is not working properly
- The “SCHEDULE” function will be disabled when the “OFF TIMER” is set.
- If the “OFF TIMER” function is enabled and the power to the LCD monitor is turned off when the power supply is interrupted unexpectedly, then the “OFF TIMER” will be reset.

Snowy Picture, Poor Sound in TV
- Check antenna/cable connection. Use new cable if necessary.

Interference in TV
- Check components for shielding, move away from monitor if necessary.

RS-232C or LAN control is not available
- Check RS-232C or LAN cable connection.

Either light vertical or horizontal stripes may appear, depending on the specific display pattern. This is no product fault or degradation.
### Product Specifications

#### LCD Module
- **Pixel Pitch:** 0.530 mm
- **Resolution:** 1920 x 1080

This LCD monitor uses RXD, TXD and GND lines for RS-232C control.

3) REMOTE IN

This diagram shows the pin assignment for the remote input connector. The pin numbers are as follows:

- GND
- DATA (DC +3 V)
- VDD (DC +3 V)
NEC DISPLAY SOLUTIONS is strongly committed to environmental protection and sees recycling as one of the company’s top priorities in trying to minimize the burden placed on the environment. We are engaged in developing environmentally-friendly products, and always strive to help define and comply with the latest independent standards from agencies such as ISO (International Organisation for Standardization) and TCO (Swedish Trades Union).

Disposing of your old NEC product
The aim of recycling is to gain an environmental benefit by means of re-use, upgrading, reconditioning or reclamation of material. Dedicated recycling sites ensure that environmentally harmful components are properly handled and securely disposed. To ensure the best recycling of our products, NEC DISPLAY SOLUTIONS offers a variety of recycling procedures and gives advice on how to handle the product in an environmentally sensitive way, once it has reached the end of its life.

All required information concerning the disposal of the product and country-specific information on recycling facilities can be found on our following websites:
http://www.nec-display-solutions.com/greencompany/ (in Europe),
http://www.nec-display.com (in Japan) or
http://www.necdisplay.com (in USA).

Energy Saving
This monitor features an advanced energy saving capability. When a Display Power Management signal is sent to the monitor, the Energy Saving mode is activated. The monitor enters a single Energy Saving mode.

WEEE Mark (European Directive 2012/19/EU)

Within the European Union
EU-wide legislation, as implemented in each Member State, requires that waste electrical and electronic products carrying the mark (left) must be disposed of separately from normal household waste. This includes monitors and electrical accessories, such as signal cables or power cords. When you need to dispose of your NEC display products, please follow the guidance of your local authority, or ask the shop where you purchased the product, or if applicable, follow any agreements made between yourself and NEC.

Outside the European Union
If you wish to dispose of used electrical and electronic products outside the European Union, please contact your local authority so as to comply with the correct disposal method.
