Assembling The Floor Stand Kit
Process begins with installation of castors or leveling feet.

-Step One
Confirm that 1/2”-13 hex-nuts are threaded onto the stem of the castors. If not, be sure to do so. Once the hex-nuts are installed, the castors can be threaded into the base of the Floor Stand Kit. Reminder, installation of leveling feet is identical, except the feet need to be adjusted to ensure the stand will sit level.

-Step Two
Attach middle-section to the base. Slip the middle-section onto the positioning cylinders. Install the four 1/2”-13 Allen head bolts, and 1/2” flat washers.
Assembling The Floor Stand Kit
Continued from previous page.

-Step Three

Attach top-section to the middle-section. Slip the top-section onto the positioning cylinders. Install the four 1/2”-13 Allen head bolts, and 1/2” flat washers.
Installing The LCD8205 Mount Rails

Continued from previous page.

-Step Four
Before the display mounts can be installed, the orientation of the LCD8205 must be determined.

-Step Five
Installing the display mounts in portrait orientation. Use six 1/2"-13 Allen head bolts and flat washers. Be sure that keyholes match the illustration.

Continued from previous page.

-Step Six
Installing the display mounts in landscape orientation. Use six 1/2”-13 Allen head bolts and flat washers. Be sure that keyholes match the illustration.

-Step Seven
Install the display in the appropriate orientation.
-Step Eight (final step)
Install lock pin, and padlock. Shown without display mounted for ease of visualization.
