NEC AccuSync™ Touch LCD Series

Flat-panel monitors ideal for applications requiring touchscreen capabilities

Equip your touchscreen applications with the quality and reliability of NEC Display Solutions LCD monitors. NEC’s solid reputation is well-known across a wide range of markets, and the AccuSync Touch LCD Series extends this legacy to the touchscreen industry. The 15” NEC AccuSync LCD52V and 17” NEC AccuSync LCD72V deliver ideal touchscreen display solutions to markets such as point-of-sale, entertainment, hospitality, kiosks, medical, industrial, education and transportation.

Flexible touchscreen options. As touch requirements differ from one application or environment to the next, our AccuSync LCD52V and LCD72V monitors are available with your choice of 3M Touch Systems capacitive or resistive touchscreen technology, while also utilizing a USB interface to connect to newer computer systems. Our capacitive models are ideal for applications that require fast, reliable and accurate touch performance. The use of 3M’s ClearTek™ screen increases durability by resisting scratches, abrasions and everyday contaminants such as dirt, liquids and harsh chemicals. Resistive models are fast, accurate, economical, offer more input flexibility and use 3M’s MicroTouch™ 5-wire screen, which is pressure-sensitive to respond to any input device, including a finger, gloved hand or pen stylus. The insulator layers in our resistive displays make this screen environmentally robust, protecting circuitry in high temperatures and humidity.

Enhanced screen performance. With contrast ratios as high as 450:1 (typical) and brightness quality much higher than CRTs at 250 cd/m², outstanding LCD monitor front-of-screen visual performance is NEC Display Solutions’ #1 goal. The AccuSync Touch LCD Series delivers vibrant colors and flicker-free images that make your time in front of the monitor more comfortable and productive. NEC’s Rapid Response™ technology provides for uninterrupted display of full-motion video with response times of 25ms or less. This remarkably quick motion makes these models better than ever for applications such as presentations and streaming video.

Intelligent power management ensures a smart investment. Using approximately 70% less power and emitting less heat than comparable CRT monitors, AccuSync Touch LCD Series monitors allow you to conserve energy and lower your total cost of ownership.

Series Features and Benefits

- **Capacitive touchscreen technology** offers fast, reliable and accurate performance, resisting scratches, abrasions and everyday contaminants.
- **Resistive touchscreen technology** provides a more economical performance with increased input flexibility and responds to any input device, including a finger, gloved hand or pen stylus.
- **USB Interface** connects the display to newer computer systems.
- **Exceptional screen performance** provides a more comfortable and productive visual experience with crisp, sharp and accurate text and images.
- **NaViSet™ software** offers an expanded and intuitive interface, allowing you to more easily adjust display settings via mouse and keyboard.
- **Slim footprint** liberates you and your desk (up to 70% weight reductions and up to 60% less space required compared to CRT monitors).
- **Low power consumption** reduces electrical costs and lowers total cost of ownership.
- **Rapid Response technology** delivers virtually uninterrupted, undistorted viewing of high-speed, full-motion video.
- **On Screen Manager (OSM®)** puts you in complete control of your screen setting adjustments.
- **Built-in power supply** allows for easy mounting of the display.
- **Wall/arm mounting capability** adds flexibility and comfort, while freeing up valuable desktop space (using third-party product).
- **Adheres to ISO 13406-2 Class II requirements** for quality screen performance.
- **NEC Display Solutions’ quality and reliability** provide peace of mind with a 3-year limited parts and labor warranty (including backlight) and 24/7 customer service and technical support.
