Product Description:

Type: LCD Display
Resolution: 1920 x 1080
Aspect Ratio: 16:9
FCC: Class A
Power Consumption: 310W (typ) 540W (abs max)
BTU’s: 1057.76 BTU/hour 1842.56 BTU/hr

NOTES:
- This document is intended to be used as a reference guide to supply useful information for a design or installation. It is not intended to be a step-by-step procedure for installation.
- Any ceilings or walls must be strong enough to support the monitor and the installation must be in accordance with any local building codes. All mounts should make secure contact to wood studs.
- 4:3 sources can be displayed on the 16:9 screen in either normal aspect ratio with bars on the left or right, or stretched horizontally to fill the screen using the menus (see “Aspect Modes” in menus and user manual).
- Distances are in inches, for millimeters multiply by 25.4.
- Distances may vary ±5%.

Tilt Angle and Rotation:
- Below is the maximum angle the monitor can be tilted. Note that the monitor can only be tilted in the landscape position.
**Ventilation Recommendations:**

Dimensions below are minimum required for proper ventilation.

**NOTE:**

- The ventilation space should not be covered or closed off at the front of the opening. If for some reason the opening needs to be covered, other means of ventilation will need to be incorporated into the design. Contact NEC for design review and recommendations.
Display dimensions (cont.):

NOTE: Contact your NEC rep for codes not listed.

NOTE: Use a cross/reverse/null modem cable.

Cable Connection:

Communication Protocol:

Interface: RS-232C
Communication System: Asynchronous
Baud Rate: 9600 bps
Data Length: 8 bits
Parity: None
Stop Bit: 1 bit
Communication Code: ASCII

Interface: Ethernet (CSMA/CD)
Communication System: TCP/IP (Internet Protocol Suite)
Communication Layer: Transport layer (TCP)
IP Address: 192.168.0.10 (default out of box)
Port Number: 7142 (Fixed)

NOTE: If so desired, jumper “Request to send” and “Clear to Send” together on both ends of the cable to simplify cable connection. These connections are not required. The only connections required are pins 2 (TxD), 3 (RxD) and 5 (GND).
Browser Control

Information and control can also be available through the HTTP browser control menu.
In order to accomplish this, type: `<http://<the Monitor’s IP address>/pd_index.html>

Note that the LAN Power needs to be turned on in order for the display to be controlled while the units are off.
All displays are set to the IP address 192.168.0.10 out of the box
Communicating network PC needs to be on the same subnet as display that is being communicated with

NOTE:
Menus on the left side of the above screenshot can be altered to control the display
Menu above is consistent with the X554HB though it states P553 on top
