**NEC DISPLAY UPDATES ENTERPRISE DESKTOP MONITOR SERIES WITH
ULTRA NARROW BEZEL MODELS USING IPS PANELS**

***Popular MultiSync E Series now available in 22-inch and 24-inch 3-sided
narrow models; include thin client mounts and other advanced features***

CHICAGO – January 11, 2017 – [NEC Display Solutions of America](#), a leading provider of [commercial LCD](#) display and [projector](#) solutions, announced today the addition of the new 22-inch MultiSync® E221N-BK and 24-inch MultiSync E241N-BK to its desktop product lineup.

Designed with the small business and entry-level enterprise customers in mind, the MultiSync E Series monitors offer IPS panels, ultra-narrow bezels on three sides and included thin client mounts for maximum value.

“The new MultiSync E Series displays expand our portfolio of ultra-narrow bezel displays offering a simple, inexpensive desktop monitor solution,” said Art Marshall, senior product manager for desktop displays. “With new features normally found in more expensive models, these products deliver maximum value at an attractive price point.”

These displays are perfect for use in doctor’s offices, library kiosks, or for general enterprise desktop usage. The ultra-narrow bezels, adjustable pivot, and thin client mount give customers a cost effective, easy-to-use and ergonomic-friendly solution.

The MultiSync E221N-BK and E241N-BK both feature a fully adjustable ergonomic stand, including 110mm height-adjust, tilt and swivel capabilities. In addition, the included stands enable pivoting to portrait orientation in either direction, allowing two displays used together to match the thin bezels in the middle, expanding the products' ability to fit into almost any existing environment.

“The E Series is designed for anyone who needs advanced features like IPS panels, ultra-narrow bezels and the included thin client mounts at a lower price point,” Marshall said. “The E221N-BK and E241N-BK are easy to use, functional in a variety of applications, and deliver on value.”

Below are additional features included in the MultiSync E221N-BK and E241N-BK:

- LED backlight technology with 16:9 aspect ratio and 1920x1080 native resolution provides a smooth viewing experience
- 25,000:1 dynamic contrast ratio delivers detailed images and text
- Expanded connectivity including DisplayPort, VGA and DVI-D ports
- Integrated speakers and headphone jack enable business conferencing
- Ambient light sensor automatically adjusts the brightness to the optimal setting depending on the environment's lighting, minimizing power consumption
- ECO Mode™ allows users to manually adjust the display's brightness to two preset settings, including ENERGY STAR, which saves more power and reduces energy costs
- Carbon footprint and cost meter allow users to quickly and easily track the savings of green gas emissions
- Compliant with the newest standards, such as ENERGY STAR 7.0 and TCO 7.0

The MultiSync [E221N-BK](#) and [E241N-BK](#) will be available in January 2017 at an estimated street price of \$219 and \$259, respectively. Both ship with a 3-year parts and labor limited warranty.
