NEC DISPLAY LAUNCHES TWO NEW 27-INCH FULL HD DESKTOP MONITORS

MultiSync® E271N and MultiSync® EA271F provide high quality at a cost-effective price

CHICAGO, June 1, 2018 – NEC Display Solutions of America, Inc., a leading provider of commercial LCD displays and projectors, today announced the launch of two 27-inch desktop monitors, the MultiSync E271N and the MultiSync EA271F.

“The MultiSync E271N and the MultiSync EA271F are packed with essential features and designed with business users in mind,” said Art Marshall, Senior Product Manager for Desktop Displays at NEC Display Solutions. “Both of these models provide a large desktop workspace with Full HD resolution; lower pixel density, which makes text easier to read; and a three-sided narrow bezel design, which results in fewer distractions.”

The E271N features Low Blue Light and Flicker Free certifications, Ambix3 connectivity (DisplayPort, HDMI, VGA) and speakers. With a fully functional stand (tilt, rotate, dual direction pivot, height adjust), business-class speakers and a thin client mount included, it fits in nearly every environment, and its IPS panel offers great viewing from any angle. An excellent desktop at a great price, it’s a perfect fit for corporate and SMB environments, back office and education, and other deployments where cost is a factor and great imaging is desired.

The more advanced EA271F replaces the MultiSync EA273Wmi. Its IPS panels provide high-quality image performance and great viewing angles, and NEC has added hardware calibration when combined with NEC’s exclusive SpectraViewII™. With a fully functional, dual direction pivot stand, it’s designed to fit any workspace and is perfect for any deployment where great imaging is desired and USB 3.1 is required. It features Low Blue Light and Flicker Free certifications, Ambix3 connectivity, speakers and human sensors that can save energy when a user isn’t nearby.

Both models are designed for multi-monitor configurations and the EA271F also includes NEC's exclusive ControlSync, which keeps settings in sync when using more than one monitor. Both models are also effective for small signage uses (less than 24/7) and are supported by a 3-year warranty.

The E271N will be available in early June at a minimum advertised price of \$319. The EA271F and SpectraView bundle EA271F-BK-SV will be available in early June at a minimum advertised price of \$419 and \$569 respectively.
