NEC DISPLAY LAUNCHES NEW COLLABORATION SUITE FOR CORPORATE, K-12 AND HIGHER EDUCATION

Robust and easy-to-use collaboration solution enables students and office workers to engage at the next level

CHICAGO, Sept. 4, 2019 – NEC Display Solutions of America, a leading provider of commercial digital signage solutions, today announced the launch of its CB Series Collaboration Suite, a robust and easy-to-use collaboration solution that elevates productivity in classrooms and corporate meetings. With its intuitive and powerful Mosaic collaboration software, the CB Series offers flexibility via multi-platform support, interactive whiteboard and wireless presenting capabilities, and simple out-of-the-box integration – just plug-in, connect and go.

“For customers who need a best-in-class collaboration solution for modern classrooms and corporate meeting rooms, the CB Series offers a value packed collaborative solution based on NEC’s Mosaic Canvas and Connect software, supplemented by the built in media player and amplified speakers” said Chris Feldman, product manager, NEC Display. “With 4K UHD picture and integrated IR touch capabilities, the collaboration suite creates an immersive collaborative experience with minimal setup.”

The CB Series Collaboration Suite is designed to meet the education needs for corporate as well as K-12 and higher education with its 4K UHD display with integrated 10-point IR touch, two built-in 12W speakers, magnetized passive pens, and a natural writing experience. The solution features powerful embedded computing including whiteboard functionality delivered through Mosaic Canvas and wireless screen sharing through Mosaic Connect.

“The CB Series Collaboration Suite is one of the most flexible collaboration solutions on the market today,” Feldman said. “The solution offers best in class compatibility with 3 HDMI 2.0 and 6 USB inputs, plus an OPS slot to add additional, more robust computing
options. All of which can utilize the built-in speakers and touch display, and allow adding accessories such as web cameras for video conferencing. The included Mosaic software provides robust functionality, while being so intuitive that students and other users can operate the programs without ever opening a manual.”

The CB Series includes the CB651Q, CB751Q and CB861Q, and is available in 65”, 75” and 86” sizes respectively. The S-IPS panels with anti-glare protective glass feature 3840 x 2160/60Hz 4K UHD resolution, 330 cd/m² brightness, Integrated SoC loaded with Mosaic Canvas and Connect, 16GB internal storage, as well as Windows, Linux, Mac, Android, and Chrome compatibility.

The CB Series Collaboration Suite begins shipping in September, with prices starting at $2,899 for the 65” CB651Q. Check out the NEC Showcase On the Road events taking place this year and early 2020 for a hands-on demonstration. For details, visit www.necdisplay.com/showcase.
