**NEC MULTISYNC PA271W DISPLAY NAMED BEST PRODUCT  
OF THE YEAR BY VIDEOAKER MAGAZINE**

***Editors Call NEC's 27-inch Widescreen LCD Display 'Absolutely Stunning'***

**CHICAGO – December 14, 2010** – [NEC Display Solutions of America](#), a leading provider of [commercial LCD](#) display and [projector](#) solutions, announced today that the editors of [Videomaker](#) Magazine named the NEC MultiSync® PA271W monitor the Best Product of the Year in the display category, calling it “absolutely stunning.” The display is featured in the publication’s January 2011 issue on newsstands now.

Besides this latest award recognition, the MultiSync PA271W display also received high marks in a product review in Videomaker’s [November issue](#).

Labs Editor Dan Bruns writes: “...with something as important as a feature film, commercial, or family archives, getting color correct the first time can really help an audience relive a moment in the way it was intended. This is where the newest offering from the display maker NEC really shines.” Later, he says that the MultiSync PA271W display “is the best option for editors doing color critical work.”

“The MultiSync PA271W has received quite a few accolades since its introduction last spring, but Videomaker’s recognition as Best Product of the Year is truly humbling,” said Art Marshall, Product Manager for NEC Display. “Through its history, NEC has gone to great lengths to ensure that its displays exceed the expectations for the applications and

markets we serve. The MultiSync PA271W is a groundbreaking display for people whose livelihoods depend on accurate color.”

NEC's MultiSync PA271W display is a high-definition monitor designed for advanced graphics applications, digital photography, video editing, print production and other environments where color accuracy is critical.
