## **NEC DISPLAY SOLUTIONS INTRODUCES TOP-OF-THE-LINE PROJECTOR TO NP MOBILE SERIES**

### ***HD-compatible NP62 Includes USB Viewer with Automatic Features***

**CHICAGO – January 8, 2009** – NEC Display Solutions of America, a leading stand-alone provider of commercial LCD displays and projectors, today announced the addition of the NP62 digital projector to its NP Mobile Series. The NP62 is designed for corporate, government and education settings, and includes Universal Serial Bus connectivity for use with a USB thumb drive, eliminating the need to carry a laptop. Images can be sent directly from a phone or computer using the Bluetooth adapter, which is optional.

The HD-compatible NP62 comes on the heels of the NP41 and NP61 released in 2008. The lightweight, automatic NP62 provides bright and colorful images while remaining quiet in operation (32dB in ECO Mode™). The quick-start and quick-cooling features minimize setup and teardown times between meetings, and the automatic focus instantly provides a sharp, detailed image.

The NP62 automatically detects the source and projects the image with auto input selection, while its AutoSense™ feature intuitively syncs the projector with most computer signals and features one-touch image optimization. The automatic vertical keystone correction technology instantly projects a square image, even when the projector is set up at a steep offset angle.

“The NP62 is one of the brightest, lightest and most portable projectors, yet provides new advanced features like USB connectivity, making it the top-of-line projector in the NP Series,” said Rich McPherson, Product Manager at NEC Display Solutions. “The NP62 is ideal for the professional presenter who needs the ultimate in connectivity.”

The NP62 digital projector features:

- 3000 lumens of brightness
- 1600:1 contrast ratio
- 1024 x 768 XGA native resolution
- Lightweight at 3.7 lbs.
- Viewer function via USB memory or Bluetooth
- Automatic focus and Automatic keystone, which provide optimum image quality
- AutoSense, which intuitively syncs the projector with most computer signals and features one-touch optimization
- Auto Power ON via RGB (15-pin) input connector when a signal is detected from a computer
- Quick startup and Instant shut down
- 15-pin RGB, RCA, S-Video input connectors and audio input
- HD compatibility
- BrilliantColor™ technology with 6-segment color wheel, which dramatically increases system brightness and color saturation
- ECO Mode technology, which increases lamp life by up to 40 percent for up to 3,500 hours
- Quiet operation at <32dB

The NP62 comes with a two-year limited parts and labor warranty, including the first year with InstaCare™ (repair and return in three business days or next business day exchange) and a one-year/500-hour lamp warranty. The projector will ship this month at an estimated street price of \$1,399.
