Manufacturer’s Recycling and Energy Information
DECLARATION OF CONFORMITY

This device complies with Part 15 of FCC Rules. Operation is subject to the following two conditions. (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

U.S. Responsible Party: NEC Display Solutions of America, Inc.
Address: 500 Park Boulevard, Suite 1100
Itasca, Illinois 60143
Tel. No.: (630) 467-3000

Type of Product: Display Monitor
Equipment Classification: Class B Peripheral
Model: MultiSync X841UHD (X841UHD)
MultiSync X981UHD (X981UHD)

We hereby declare that the equipment specified above conforms to the technical standards as specified in the FCC Rules.

FCC Information

1. Use the attached specified cables with the MultiSync X841UHD (X841UHD)/MultiSync X981UHD (X981UHD) color monitor so as not to interfere with radio and television reception.
   (1) Please use the supplied power cord or equivalent to ensure FCC compliance.
   (2) Please use the supplied shielded video signal cable.

2. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
   • Reorient or relocate the receiving antenna.
   • Increase the separation between the equipment and receiver.
   • Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
   • Consult your dealer or an experienced radio/TV technician for help.

If necessary, the user should contact the dealer or an experienced radio/television technician for additional suggestions. The user may find the following booklet, prepared by the Federal Communications Commission, helpful: “How to Identify and Resolve Radio-TV Interference Problems.” This booklet is available from the U.S. Government Printing Office, Washington, D.C., 20402, Stock No. 004-000-00345-4.

Windows is a registered trademark of Microsoft Corporation.
NEC is a registered trademark of NEC Corporation.
OmniColor is a registered trademark of NEC Display Solutions Europe GmbH in the countries of EU and Switzerland.
DisplayPort and DisplayPort Compliance Logo are trademarks owned by the Video Electronics Standards Association.
All other brands and product names are trademarks or registered trademarks of their respective owners.

HDMI, the HDMI logo and High-Definition Multimedia Interface are trademarks or registered trademarks of HDMI Licensing LLC in the United States and other countries.

Trademark PJLink is a trademark applied for trademark rights in Japan, the United States of America and other countries and areas.

CRESTRON and ROOMVIEW are registered trademarks of Crestron Electronics, Inc. in the United States and other countries.

GPL/LGPL Software Licenses
The product includes software licensed under GNU General Public License (GPL), GNU Lesser General Public License (LGPL), and others.
For more information on each software, see “readme.pdf” inside the “about GPL&LGPL” folder on the supplied CD-ROM.
Important Information

**WARNING**

TO PREVENT FIRE OR SHOCK HAZARDS, DO NOT EXPOSE THIS UNIT TO RAIN OR MOISTURE. ALSO, DO NOT USE THIS UNIT'S POLARIZED PLUG WITH AN EXTENSION CORD RECEPTACLE OR OTHER OUTLETS UNLESS THE PRONGS CAN BE FULLY INSERTED.

REFRAIN FROM OPENING THE CABINET AS THERE ARE HIGH VOLTAGE COMPONENTS INSIDE.

REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

**CAUTION**

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, MAKE SURE POWER CORD IS UNPLUGGED FROM WALL SOCKET. TO FULLY DISENGAGE THE POWER TO THE UNIT, PLEASE DISCONNECT THE POWER CORD FROM THE AC OUTLET. DO NOT REMOVE COVER (OR BACK). NO USER SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

This symbol warns user that uninsulated voltage within the unit may have sufficient magnitude to cause electric shock. Therefore, it is dangerous to make any kind of contact with any part inside this unit.

This symbol alerts the user that important literature concerning the operation and maintenance of this unit has been included. Therefore, it should be read carefully in order to avoid any problems.

**CAUTION:** Please use the power cord provided with this monitor in accordance with the table below. If a power cord is not supplied with this equipment, please contact your supplier. For all other cases, please use a power cord that matches the AC voltage of the power outlet and has been approved by and complies with the safety standard of your particular country.

* When operating the MultiSync monitor with its AC 125-240V power supply, use a power supply cord that matches the power supply voltage of the AC power outlet being used.

**NOTE:** This product can only be serviced in the country where it was purchased.

Use the power cord which has BSMI mark at both ends when you use this monitor in Taiwan.

- The intended primary use of this product is as an Information Technical Equipment in an office or domestic environment.
- The product is intended to be connected to a computer and is not intended for the display of television broadcast signals.
FOR OPTIMUM PERFORMANCE, PLEASE NOTE THE FOLLOWING WHEN SETTING UP AND USING THE MULTI-FUNCTION MONITOR:

• DO NOT OPEN THE MONITOR. There are no user serviceable parts inside and opening or removing covers may expose you to dangerous shock hazards or other risks. Refer all servicing to qualified service personnel.

• Do not bend, crimp or otherwise damage the power cord.

• Do not place any heavy objects on the power cord. Damage to the cord may cause shock or fire.

• The power supply cord you use must have been approved by and comply with the safety standards of your country. (Type H05VV-F 3G 1mm2 should be used in Europe).

• In UK, use a BS-approved power cord with molded plug having a black (13A) fuse installed for use with this monitor.

• The power cable connector is the primary means of detaching the system from the power supply. The monitor should be installed close to a power outlet, which is easily accessible.

• Do not spill any liquids into the cabinet or use your monitor near water.

• Do not insert objects of any kind into the cabinet slots, as they may touch dangerous voltage points, which can be harmful or fatal or may cause electric shock, fire or equipment failure.

• Do not place this product on a sloping or unstable cart, stand or table, as the monitor may fall, causing serious damage to the monitor.

• Do not mount this product upside down for an extended period of time. These types of fluids and materials can damage internal parts and cause permanent damage to the screen (X981UHD).

• Do not mount or secure this product by using the backside handle. It may fall and cause personal injury.

• If glass is broken, handle with care. It may fall and cause personal injury.

• Do not cover vent on monitor.

• If monitor or glass is broken, do not come in contact with the liquid crystal and handle with care.

• Allow adequate ventilation around the monitor, so that heat can properly dissipate. Do not block ventilated openings or place the monitor near a radiator or other heat sources. Do not put anything on top of the monitor.

• Do not move or mount this product by hanging a rope or wire to the backside handle. Do not mount or secure this product by using the backside handle. It may fall and cause personal injury.

• Handle with care when transporting. Save packaging for transporting.

• If using the cooling fan continuously, it is recommended to wipe the coolers clean a minimum of once a month.

• Please clean the holes of back cabinet to reject dirt and dust. When using a LAN cable, do not connect to a peripheral device with wiring that might have excessive voltage.

• Do not use monitor under rapid temperature and humidity change condition or avoid cold air from air-conditioning outlet directly, as it may shorten the lifetime of the monitor or cause condensation. If condensation happens, let the monitor stand unplugged until there is no condensation.

Connecting to a TV

• Cable distribution system should be grounded (earthed) in accordance with ANSI/NFPA 70, the National Electrical Code (NEC), in particular Section 820.93, Grounding of Outer Conductive Shield of a Coaxial Cable.

• The screen of the coaxial cable is intended to be connected to earth in the building installation.

Immediately unplug your monitor from the wall outlet and refer servicing to qualified service personnel under the following conditions:

• When the power supply cord or plug is damaged.

• If liquid has been spilled, or objects have fallen into the monitor.

• If the monitor has been exposed to rain or water.

• If the monitor has been dropped or the cabinet damaged.

• If you notice any structural damage such as cracks or unnatural wobbling.

• If the monitor does not operate normally by following operating instructions.

Recommended Use

• For optimum performance, allow 20 minutes for warm-up.

• Rest your eyes periodically by focusing on an object at least 5 feet away. Blink often.

• Position the monitor at a 90° angle to windows and other light sources to minimize glare and reflections.

• Clean the LCD monitor surface with a lint-free, non-abrasive cloth. Avoid using any cleaning solution or glass cleaner!

• Adjust the monitor’s brightness and contrast to enhance readability.

• Avoid displaying fixed patterns on the monitor for long periods of time to avoid image persistence (after image effects).

• Get regular eye checkups.

Ergonomics

To realize the maximum ergonomic benefits, we recommend the following:

• Use the preset Size and Position controls with standard signals.

• Use the preset Color Setting.

• Use non-interlaced signals.

• Do not use primary color blue on a dark background, as it may cause insufficient contrast.

Cleaning the LCD Panel

• When the liquid crystal panel is dusty, please gently wipe with a soft cloth.

• Please do not rub the LCD panel with hard material.

• Please do not apply pressure to the LCD panel or cause curvature.

• Please do not use OA cleaner as it will cause deterioration or discolor on the LCD surface.

Cleaning the Cabinet

• Unplug the power supply.

• Gently wipe the cabinet with a soft cloth.

• To clean the cabinet, dampen the cloth with a neutral detergent and water, wipe the cabinet and follow with a dry cloth.

NOTE: DO NOT clean with benzene thinner, alkaline detergent, alcoholic system detergent, glass cleaner, wax, polish cleaner, soap powder, or insecticide. Rubber or vinyl should not be in contact with the cabinet for an extended period of time. These types of fluids and materials can cause the paint to deteriorate, crack or peel.

* The product you purchased may not have this feature.
Your new MultiSync monitor box* should contain the following:

- LCD monitor
- Power cord*1
- Video Signal Cable (DisplayPort cable)
- Video Signal Cable (Mini DisplayPort to DisplayPort cable)
- Wireless Remote Control and AAA Batteries
- Setup Manual
- Clamp x 1
- Screw with washer (M4 x 10) x 1
- CD-ROM

* Remember to save your original box and packing material to transport or ship the monitor.

*1 Type and number of power cords included will depend on where the LCD monitor is to be shipped. When more than one power cord is included, please use a power cord that matches the AC voltage of the power outlet and has been approved by and complies with the safety standard of your particular country.
Installation

This device cannot be used or installed without the Tabletop Stand or other mounting accessory for support. For proper installation it is strongly recommended to use a trained, NEC authorized service person. Failure to follow NEC standard mounting procedures could result in damage to the equipment or injury to the user or installer. Product warranty does not cover damage caused by improper installation. Failure to follow these recommendations could result in voiding the warranty.

Mounting

DO NOT mount the monitor yourself. Please ask your dealer. For proper installation it is strongly recommended to use a trained, qualified technician. Please inspect the location where the unit is to be mounted. Mounting on wall or ceiling is the customer’s responsibility. Not all walls or ceilings are capable of supporting the weight of the unit. Product warranty does not cover damage caused by improper installation, remodelling, or natural disasters. Failure to comply with these recommendations could result in voiding the warranty.

DO NOT block ventilated openings with mounting accessories or other accessories.

For NEC Qualified Personnel:

To ensure safe installation, use two or more brackets to mount the unit. Mount the unit to at least two points on the installation location.

Please note the following when mounting on wall or ceiling

- When using mounting accessories other than those that are NEC approved, they must comply with the VESA-compatible (FDMlv1) mounting method.
- NEC recommends mounting interfaces that comply with UL1678 standard in North America.
- NEC strongly recommends using size M8 screws (15-17 mm + thickness of bracket and washers in length). If using screws longer than 15-17 mm, check the depth of the hole. (Recommended Fasten Force: 1125 - 1375N•cm). Bracket hole should be under φ 10 mm.
- Prior to mounting, inspect the installation location to insure that it is strong enough to support the weight of the unit so that the unit will be safe from harm.
- Refer to the instructions included with the mounting equipment for detailed information.
- Make sure there is no gap between the monitor and the bracket.

Orientation

- When using the display in the portrait position, the monitor should be rotated clockwise so that the left side is moved to the top, right side is moved to the bottom. This will allow for proper ventilation and will extend the lifetime of the monitor. Improper ventilation may shorten the lifetime of the monitor.

Please note the following when mounting on wall or ceiling

- When using mounting accessories other than those that are NEC approved, they must comply with the VESA-compatible (FDMlv1) mounting method.
- NEC recommends mounting interfaces that comply with UL1678 standard in North America.
- NEC strongly recommends using size M8 screws (15-17 mm + thickness of bracket and washers in length). If using screws longer than 15-17 mm, check the depth of the hole. (Recommended Fasten Force: 1125 - 1375N•cm). Bracket hole should be under φ 10 mm.
- Prior to mounting, inspect the installation location to insure that it is strong enough to support the weight of the unit so that the unit will be safe from harm.
- Refer to the instructions included with the mounting equipment for detailed information.
- Make sure there is no gap between the monitor and the bracket.

For NEC Qualified Personnel:

To ensure safe installation, use two or more brackets to mount the unit. Mount the unit to at least two points on the installation location.

Please note the following when mounting on wall or ceiling

- When using mounting accessories other than those that are NEC approved, they must comply with the VESA-compatible (FDMlv1) mounting method.
- NEC recommends mounting interfaces that comply with UL1678 standard in North America.
- NEC strongly recommends using size M8 screws (15-17 mm + thickness of bracket and washers in length). If using screws longer than 15-17 mm, check the depth of the hole. (Recommended Fasten Force: 1125 - 1375N•cm). Bracket hole should be under φ 10 mm.
- Prior to mounting, inspect the installation location to insure that it is strong enough to support the weight of the unit so that the unit will be safe from harm.
- Refer to the instructions included with the mounting equipment for detailed information.
- Make sure there is no gap between the monitor and the bracket.

For landscape position:

For portrait position:

X841UHD:  
X981UHD:
2. Changing NEC logo plate position.

Removing the logo plate: Insert a thin stick (less than 2 mm diameter) into the hole in the bottom of logo plate and remove the logo plate.

Attaching the logo plate: Hook the part (1) of logo plate into the bezel and press in.

Mounting location

- The ceiling and wall must be strong enough to support the monitor and mounting accessories.
- DO NOT install in locations where a door or gate can hit the unit.
- DO NOT install in areas where the unit will be subjected to strong vibrations and dust.
- DO NOT install near where the main power supply enters the building.
- Do not install in where people can easily grab and hang onto the unit or the mounting apparatus.
- When mounting in a recessed area, as in a wall, leave at least 4 inches (100 mm) of space between the monitor and the wall for proper ventilation.
- Allow adequate ventilation or provide air conditioning around the monitor, so that heat can properly dissipate away from the unit and mounting apparatus.

Mounting on ceiling

- Ensure that the ceiling is sturdy enough to support the weight of the unit and the mounting apparatus over time, against earthquakes, unexpected vibrations, and other external forces.
- Be sure the unit is mounted to a solid structure within the ceiling, such as a support beam. Secure the monitor using bolts, spring lock washers, washer and nut.
- DO NOT mount to areas that have no supporting internal structure. DO NOT use wood screws or anchor screws for mounting. DO NOT mount the unit to trim or to hanging fixtures.

Maintenance

- Periodically check for loose screws, gaps, distortions, or other problems that may occur with the mounting apparatus. If a problem is detected, please refer to qualified personnel for service.
- Regularly check the mounting location for signs of damage or weakness that may occur over time.

Attaching Mounting Accessories

The monitor is designed for use with the VESA mounting system.

1. Attach eyebolts (not included) for mounting

This model is equipped with attachable eyebolts to aid in mounting.
- Screw the eyebolts into eyebolt holes as shown in the picture.
- Be sure eyebolts are secure.
- In order to move the monitor into position, use a lifting device attached to the eyebolts.

DO NOT mount the monitor using only the eyebolts.

X841UHD:

Eyebolt Hole

Eyebolt (M10) (not included)

X981UHD:

Eyebolt Hole

Eyebolt (M10) (not included)

2. Attach Mounting Accessories

Be careful to avoid tipping monitor when attaching accessories.

Mounting accessories can be attached with the monitor in the face down position. To avoid damaging the screen face, place the protective sheet on the table underneath the LCD. The protective sheet was wrapped around the LCD in the original packaging. Make sure there is nothing on the table that can damage the monitor.
When using mounting accessories other than NEC compliant and approved, they must comply with the VESA-compatible mounting method.

**NOTE:** Prior to installation, be sure to place the monitor on a flat area with adequate space.

### 3. Using Option Board

1. Turn off the main power switch.
2. Remove the attached slot cover by unscrewing the installed screws (Figure 1).
3. Insert option board in to the monitor. Attach the slot cover by using the removed screws.

**NOTE:** Please contact your supplier for available option boards. Do not apply excessive force to manipulate the optional board before fixing it with screws.

![Figure 1](image)

### 4. Installing and removing optional table top stand

**CAUTION:** Installing and removing the stand must be done by four or more people.

To install, follow those instructions included with the stand or mounting apparatus. Use only those devices recommended by the manufacturer.

**NOTE:** Use ONLY screws which are included with the optional table top stand.

When installing the LCD monitor stand, handle the unit with care to avoid pinching your fingers.

![Optional table top stand](image)

**NOTE:** Install the stand in the direction of the arrow which is imprinted on the surface of the stand. Use the ST-801.

**NOTE:** DO NOT use this monitor on the floor with the table top stand. Please use this monitor on a table or with a mounting accessory for support.

### 5. Ventilation Requirements

When mounting in an enclosed space or recessed area, leave adequate room between the monitor and the enclosure to allow heat to disperse, as shown below.

![Ventilation Diagram](image)

Allow adequate ventilation or provide air conditioning around the monitor, so that heat can properly dissipate away from the unit and mounting apparatus; especially when you use monitors in multiple screen.

**NOTE:** The sound quality of the internal speakers will differ according to the acoustics of the room.

### 6. Prevent Tipping

When using the display with the optional table top stand fasten the LCD to a wall using a cord or chain that can support the weight of the monitor in order to prevent the monitor from falling. Fasten the cord or chain to the monitor using the provided clamps and screws are included with the optional table top stand.

![Screw Holes](image)

Before attaching the LCD monitor to the wall, make sure that the wall can support the weight of the monitor.

Be sure to remove the cord or chain from the wall before moving the LCD.
Parts Name and Functions

Control Panel

1. **POWER button (\(\bigcirc\))**
   Switches the power on/off. See also page 16.

2. **MUTE button (MUTE)**
   Switches the audio mute ON/OFF.

3. **INPUT button (INPUT)**
   Acts as SET/POINT ZOOM button within OSD menu.
   (Toggle switches between \([DVI1]\), \([DVI2]\), \([DPORT]\), \([HDMI1]\), \([HDMI2]\), \([HDMI3]\), \([HDMI4]\), \([OPTION]\)*). These are available inputs only, shown as their factory preset name.

4. **PLUS button (+)**
   Increases the audio output level when the OSD menu is turned off.
   Acts as (+) button to increase the adjustment with OSD menu.

5. **MINUS button (-)**
   Decreases the audio output level when the OSD menu is turned off.
   Acts as (-) button to decrease the adjustment with OSD menu.

6. **UP button (\(\uparrow\))**
   Activates the OSD menu when the OSD menu is turned off.
   Acts as \(\uparrow\) button to move the highlighted area up to select adjustment items within OSD menu.

7. **DOWN button (\(\downarrow\))**
   Activates the OSD menu when the OSD menu is turned off.
   Acts as \(\downarrow\) button to move the highlighted area down to select adjustment items within OSD menu.

8. **EXIT button (EXIT)**
   Activates the OSD menu when the OSD menu is turned off.
   Acts as EXIT button within the OSD to move to previous menu.

9. **Remote control sensor and Power Indicator**
   Receives the signal from the remote control (when using the wireless remote control). See also page 11.
   Glows green when the LCD monitor is in active mode*.
   Glows red when the LCD is in POWER OFF mode.
   Glows amber when the monitor is in Power Save Mode.
   Green and Amber blink alternately while in Power Standby mode with the “SCHEDULE SETTINGS” function enabled.
   When a component failure is detected within the monitor, the indicator will blink red.
   * If “OFF” is selected in “POWER INDICATOR” (see page 27), LED will not light when the LCD monitor is in active mode.

10. **Room light sensing sensor**
    Detects the level of ambient light, allowing the monitor to make automatic adjustments to the backlight setting, resulting in a more comfortable viewing experience. Do not cover this sensor. See page 31.

**Control Key Lock Mode**

This control completely locks out access to all Control Key functions. To activate the control key lock function, press both \(\downarrow\) and \(\uparrow\) and hold down simultaneously for more than 3 seconds. To resume user mode, press both \(\downarrow\) and \(\uparrow\) and hold simultaneously for more than 3 seconds.

*: This function depends on which option board you use.
Terminal Panel

1 Main Power Switch
On/Off switch to turn main power ON/OFF.

2 AC IN connector
Connects with the supplied power cord.

3 Service port
This USB slot is for future software upgrades.

4 LAN port (RJ-45)
LAN connection. See page 34 and 37.
NOTE: Please give priority for use to LAN1.

5 REMOTE IN
Use the optional wired remote control by connecting it to your monitor.
NOTE: Do not use this connector unless specified.

6 RS-232C (D-Sub 9 pin)
Connect RS-232C input from external equipment such as a computer in order to control RS-232C functions.

7 LINE IN
To input audio signal from external equipment such as a computer or player.

8 DVI IN (DVI-D) (Dual Link)
To input digital RGB signals from a computer or HDTV device having a digital RGB output.
* This connector does not support analog input.

9 HDMI IN
To input digital HDMI signals.

10 DisplayPort IN
To input DisplayPort signals.

11 Internal speaker

12 Internal/External speaker switch
Internal speaker: Internal speaker
External speaker: External speaker.
NOTE: Please power off the monitor when you use the Internal/External speaker switch.

13 EXTERNAL SPEAKER TERMINAL
To output the audio signal from LINE IN, DisplayPort and HDMI.
Red terminal is plus (+).
Black terminal is minus (-).
NOTE: This speaker terminal is for 15 W + 15 W (8 ohm) speaker.

14 LINE OUT
To output the audio signal from the LINE IN, DisplayPort and HDMI to an external device (stereo receiver, amplifier, etc.).

15 USB Downstream
To connect the monitor to USB devices.

16 USB Upstream
To connect the monitor to external equipment such as a computer.

17 Option board slot
Slot 2 type accessory is available. Please contact your supplier for detailed information.
NOTE: Please contact your supplier for available option board.

18 Kensington Lock
For security and theft prevention.

19 Intelligent wireless data sensor
Sensor for wireless communication of the monitor information and settings.
Wireless Remote Control

1. **POWER button**
   Switches the power on/standby.

2. **INPUT button**
   Selects input signal.
   - HDMI1: HDMI1
   - HDMI2: HDMI2
   - HDMI3: HDMI3
   - HDMI4: HDMI4
   - DVI1: DVI1
   - DVI2: DVI2
   - DisplayPort: DPORT
   - OPTION: OPTION*
   - PRESET1: PRESET1*3
   - PRESET2: PRESET2*3

3. **MULTI INPUT button**
   Selects input signal. See page 29.
   - OPTION: OPTION*

4. **OPTION MENU button**

5. **KEYPAD**
   Presses buttons to set and change passwords, change channel and set REMOTE ID.

6. **ENT button**

7. **DISPLAY button**
   Turns on/off the information OSD. See page 18.

8. **MENU button**
   Turns on/off the menu mode.

9. **ACTIVE PICTURE button**
   Selects active picture.

10. **EXIT button**
    Returns to previous menu within OSD menu.

11. **UP/DOWN button (▲/▼)**
    Acts as ▲ ▼ button to move the highlighted area up or down to select adjustment items within OSD menu.
    Small screen which adjusted “PIP” mode moves up or down.

12. **MINUS/PLUS (-/+)**
    Increases or decreases the adjustment level within OSD menu settings.
    Small screen which adjusted “PIP” mode moves left or right and increases or decreases the size.

13. **SET/POINT ZOOM button**
    Makes selection. Activates POINT ZOOM function when OSD menu is not shown.

14. **VOLUME UP/DOWN button (VOL +/-)**
    Increases or decreases audio output level.

15. **CH/ZOOM UP/DOWN button (CH/ZOOM +/-)**
    Increases or decreases POINT ZOOM level.

16. **GUIDE button**

17. **MUTE button**
    Turns on/off mute function.

18. **PICTURE MODE button**
    Selects picture mode, [HIGHBRIGHT], [STANDARD], [sRGB], [CINEMA], [CUSTOM1], [CUSTOM2], [SVE-(1-5) SETTINGS]. See page 21.
    - HIGHBRIGHT: for moving images such as DVD.
    - STANDARD: for images.
    - sRGB: for text based images.
    - CINEMA: for movies.
    - CUSTOM1 and CUSTOM2: activates auto dimming function. See page 31.
    - SVE-(1-5) SETTINGS: for images and movies.

19. **ASPECT button**
    Selects picture aspect, [FULL], [WIDE], [DYNAMIC], [1:1], [ZOOM] and [NORMAL]. See page 17.

20. **AUDIO INPUT button**
    Selects audio input source [LINE IN], [OPTION]*2, [HDMI1], [HDMI2], [HDMI3], [HDMI4], [DPORT].

21. **IMAGE FLIP button**
    Toggle switches between [H FLIP], [V FLIP], [180° ROTATE] and [NONE]. See page 24.
MULTI PICTURE button
ON/OFF button: Toggle switches between ON and OFF.
See page 17.
MODE button: Selects picture number and a mode from PIP, PBP 1, PBP 2, PBP 3.
CHANGE button: Selects a pair of pictures. You can swap images between the selected two pictures.
PICTURE ASPECT button: Selects active picture frame aspect.
ROTATE button: Selects a multi picture to rotate 90°.
ALL ROTATE button: All multi pictures rotate 90°.
When MULTI PICTURE is OFF, the displayed single picture rotates 90°.
NOTE: Enable to change each multi picture size by pressing SET/POINT ZOOM button during multi picture mode.
You cannot select input other than the setting of the HDMI/DVI SELECT.
STILL button
ON/OFF button: Activates/deactivates still picture mode.
STILL CAPTURE button: Captures still picture.
NOTE: This function is released when selecting MULTI PICTURE MODE, TEXT TICKER, SCREEN SAVER, POINT ZOOM, IMAGE FLIP except for NONE, SUPER in INPUT CHANGE, INPUT CONFIGURATION.
When STILL is active, ROTATE is not available.
REMOTE ID button
Activates REMOTE ID function. See page 33.
MTS button*1
Activates closed captioning.
NOTE: VIDEO*2, S-VIDEO*2 inputs only.

*1: This button’s action depends on which option board you use. Refer to the option board’s manual for further information.
*2: This function depends on which option board you use.
*3: This function depends on INPUT CONFIGURATION setting.

NOTE: The buttons with no explanation do not function.

Operating Range for the Remote Control
Points the top of the remote control toward the LCD monitor’s remote sensor during button operation.
Uses the remote control within a distance of about 7 m (23 ft.) from remote control sensor or at a horizontal and vertical angle of within 30° within a distance of about 3.5 m (10 ft.).

Caution: Important, the remote control system may not function when direct sunlight or strong illumination strikes the remote control sensor or when there is an object in the path.

Handling the remote control
• Do not subject to strong shock.
• Do not allow water or other liquid to splash the remote control. If the remote control gets wet, wipe it dry immediately.
• Avoid exposure to heat and steam.
• Other than to install the batteries, do not open the remote control.
Setup

1. Determine the installation location
CAUTION: Installing your LCD monitor must be done by a qualified technician. Contact your dealer for more information.

CAUTION: MOVING OR INSTALLING THE LCD MONITOR MUST BE DONE BY FOUR OR MORE PEOPLE. Failure to follow this caution may result in injury if the LCD monitor falls.

CAUTION: Do not mount or operate the monitor upside down (X841UHD). Do not mount or operate the monitor upside down or face down (X981UHD).

CAUTION: This LCD has a temperature sensor and cooling fan, including a fan for the option board. If the LCD becomes too hot, the cooling fan will turn on automatically. The option board’s fan is active although the temperature is lower than normal operating temperature for cooling the option board. If the LCD becomes overheated while the cooling fan is running, a “Caution” warning will appear. If the “Caution” warning appears, discontinue use and allow the unit to cool. Using the cooling fan will reduce the likelihood of early circuit failure and may help reduce image degradation and “Image Persistance”. If the LCD is used in an enclosed area or if the LCD panel is covered with a protective screen, please check the inside temperature of the monitor by using the “HEAT STATUS” control in the OSD (see page 28). If the temperature is higher than the normal operating temperature, please turn the cooling fan to ON within the FAN CONTROL menu within the OSD (see page 28).

IMPORTANT: Lay the protective sheet, which was wrapped around the LCD monitor when it was packaged, beneath the LCD monitor so as not to scratch the panel.

2. Install the remote control batteries
The remote control is powered by two 1.5V AAA batteries. To install or replace batteries:

A. Press and slide to open the cover.
B. Align the batteries according to the (+) and (–) indications inside the case.
C. Replace the cover.

CAUTION: Incorrect usage of batteries can result in leaks or bursting.

NEC recommends the following battery use:
• Place “AAA” size batteries matching the (+) and (–) signs on each battery to the (+) and (–) signs of the battery compartment.
• Do not mix battery brands.
• Do not combine new and old batteries. This can shorten battery life or cause liquid leakage of batteries.
• Remove dead batteries immediately to prevent battery acid from leaking into the battery compartment.
• Do not touch exposed battery acid, it may injure skin.

NOTE: If you do not intend to use the Remote Control for a long period of time, remove the batteries.

3. Connect external equipment
(See pages 14 and 15)
• To protect the external equipment; turn off the main power before making connections.
• Refer to your equipment user manual for further information.

NOTE: Do not connect/disconnect cables when turning on the monitor or other external equipment as this may result in a loss of the monitor image.

4. Connect the supplied power cord
• The equipment should be installed close to an easily accessible power outlet.
• Please fasten power cord to the LCD monitor by attaching the screw and clamp.
• Fully insert the prongs into the power outlet socket. A loose connection may cause image degradation.

NOTE: Please refer to the “Safety Precautions and Maintenance” section of this manual for proper selection of AC power cord.
5. Switch on the power of all the attached external equipment
When connected with a computer, switch on the power of the computer first.

6. Operate the attached external equipment
Display the signal from the desired input source.

7. Adjust the sound
Make volume adjustments when required.

8. Adjust the screen (See pages 23 and 24)
Make adjustments of the screen display position when necessary.

9. Adjust the image (See page 23)
Make adjustments such as backlight or contrast when required.

10. Recommended Adjustments
To reduce the risk of the “Image Persistence”, please adjust the following items based on the application being used:
“SCREEN SAVER”, “SIDE BORDER COLOR” (See page 28)
“DATE & TIME” (See page 25), “SCHEDULE SETTINGS” (See page 24).
It is recommended that the “FAN CONTROL” setting (See page 28) be turned to ON also.
Connections

NOTE: Do not connect/disconnect cables when turning on the monitor or other external equipment as this may result in a loss of the monitor image.

NOTE: Use an audio cable without a built-in resistor. Using an audio cable with a built-in resistor turns down the sound.

Before making connections:
* First turn off the power of all the attached equipment and make connections.
* Refer to the user manual included with each separate piece of equipment.

*1: Depends on signal type.
*2: INPUT CONFIGURATION (See page 18).
*3: DVI signal is not displayed by factory setting. To display DVI signal, set to “HDMI/DVI” or “DVI” at HDMI/DVI SELECT.
Connecting a Personal Computer
Connecting your computer to your LCD monitor will enable you to display your computer’s screen image. Some video cards may not display an image correctly. Your LCD monitor displays proper image by adjusting the factory preset timing signal automatically.

<Typical factory preset signal timing>

*: Dual Link cable.

- If you use with a Macintosh device, set “Mirroring” to Off on your device.
- Refer to your Macintosh's owner's manual for more information about your computer's video output requirements and any special identification or configuration your monitor's image and monitor may require.
- Input TMDS signals conforming to DVI standards.
- To maintain display quality, use a cable that conforms to DVI standards.

Connecting a Player or Computer with HDMI
- Please use an HDMI cable with HDMI logo.
- It may take a moment for the signal to appear.
- Some video cards or drivers may not display an image correctly.
- When you use a computer with HDMI, please set OVER SCAN to “AUTO” or “OFF” (see page 30).

Connecting a Computer with DisplayPort
- Please use DisplayPort cable with DisplayPort compliance logo.
- It may take a moment for the signal to appear.
- Please note that when connecting a DisplayPort cable to a component with a signal conversion adapter, an image may not appear.
- Select DisplayPort cables feature a locking function. When removing this cable, hold down the top button to release the lock.

Connecting a USB device with USB port
**Up Stream Port:** Connect to a USB compatible computer with a USB cable.
**Down Stream Port:** Connect USB compatible flash memory, mouse or key board to Down Stream Port.
- Please make sure the connector shape and orientation when connecting the USB cable.
- Depending on the use of computer BIOS, OS or device, USB function may not working. In this case, please check User’s manual of your computer or device, or contact your supplier for detail information.
- Before turning off the main power switch of monitor or shutting down Windows®, please turn off USB function and remove the USB cable from the monitor. You may lose data when computer got crush.
- It may take few seconds the monitor recognizes USB input. Do not eject USB cable or eject and insert USB cable before monitor recognizes the input.
Basic Operation

Power ON and OFF Modes

The LCD monitor power indicator will turn green while powered on and will turn red or amber while powered off.

**NOTE:** The Main Power Switch must be in the ON position in order to power up the monitor using the remote control or the Power Button.
**Power Indicator**

<table>
<thead>
<tr>

<td>Red Blinking</td>
</tr>
</tbody>
</table>

*1 If “OFF” is selected in POWER INDICATOR (page 27), the LED will not light when the LCD monitor is in active mode.
*2 Without any option, with factory settings.

**Initial settings**

Setting LAN POWER (see page 28) and POWER SAVE (see page 27) windows appear the first time the power is on. These settings are only necessary upon initial setup. However, this message window appears when the power is on after FACTORY RESET is done. When LAN POWER is set to ON and POWER SAVE is set to “DISABLE” after FACTORY RESET, then the monitor power is off and on again, the message window will not appear.

**Using Power Management**

The LCD monitor follows the VESA approved DPM Display Power Management function.

The power management function is an energy saving function that automatically reduces the power consumption of the display when the keyboard or the mouse has not been used for a fixed period. The power management feature on your new display has been set to the “AUTO STANDBY” mode. This allows your display to enter a Power Saving Mode when no signal is applied. This could potentially increase the life and decrease the power consumption of the display.

**NOTE:**

Depending on the computer and video card used, this function may not operate.

**NOTE:**

The monitor automatically goes into OFF at the preset time period after signal is lost.

**MULTI PICTURE MODE**

Selects MULTI PICTURE MODE. You can select up to 4 pictures. When MULTI PICTURE is “ON” and PICTURE NUMBER is 2 PICTURES, the display images are like below.

2 PICTURES

![2 PICTURES Diagram]

When MULTI PICTURE is “ON” and PICTURE NUMBER is 3 PICTURES, the display images are like below.

3 PICTURES

![3 PICTURES Diagram]

When MULTI PICTURE is “ON” and PICTURE NUMBER is 4 PICTURES, the display image is set to like below.

4 PICTURES

![4 PICTURES Diagram]

MULTI PICTURE MODE (See page 25).

**Aspect**

DV1, DV2, DPORT, OPTION*4, PRESET1*5, PRESET2*5

FULL ➔ 1:1 ➔ ZOOM ➔ NORMAL

<tr>
<td>Letterbox</td>
<td>WIDE</td>
</tr>
</tbody>
</table>

*3 Grey areas indicate unused portions of the screen.

**NORMAL:** Displays the aspect ratio the same as it is sent from the source.

**FULL:** Fills entire screen.

**WIDE:** Expands a 16:9 letter box signal to fill entire screen.

**DYNAMIC:** Expands a 4:3 pictures to fill the entire screen with non-linearity. Some of the outside image area will be cut off due to expansion.

**1:1:** Displays the image in a 1 by 1 pixel format.

**ZOOM**

The image can be expanded beyond the active display area. The image which is outside of active display area is not shown.

![ZOOM Diagram]
INPUT CONFIGURATION

You can display 3840 x 2160 60 Hz image by using multiple input signals. Selects input sources. Depending on the setting at HDMI/DVI SELECT, the selection of INPUT CONFIGURATION is changed.

<table>

INPUT CONFIGURATION (See page 29).

Information OSD

The Information OSD provides information such as: Input Source, Picture Size, etc. Press the DISPLAY button on the remote to bring up the Information OSD.
Picture Mode

Depending on the setting at SPECTRAVIEW ENGINE (see page 31), selection of Picture mode is changed.

SPECTRAVIEW ENGINE is “ON”:
Selects five picture modes by Picture mode in OSD menu or using Picture mode button on the wireless remote control.

Selecting Picture mode with wireless remote control
By pressing Picture mode button, picture mode changes.
SVE-1 → SVE-2 → SVE-3 → SVE-4 → SVE-5

Selecting or changing Picture mode at Picture mode in OSD menu.
Selects a setting from SVE-1 to SVE-5. By pressing SET button again you can set below menus.

Choose the Picture Mode that is most suitable for the type of content that is shown.
There are several types of mode (sRGB, Adobe®RGB SIM., eciRGB_v2 SIM., DCI SIM., REC-Bt709, HIGH BRIGHT, FULL, DICOM SIM, PROGRAMMABLE).

- Each PICTURE MODE includes LUMINANCE, WHITE, GAMMA, BLACK, RED, GREEN, BLUE, COLOR VISION EMU, UNIFORMITY and METAMERISM settings.

The type of PRESET

<table>
<thead>
<tr>
<th>PRESET</th>
<th>PURPOSE</th>
</tr>
</thead>
<tbody>
<tr>
<td>sRGB</td>
<td>Standard color space used for the Internet, Windows operating systems and digital cameras. Recommended setting for general color management.</td>
</tr>
<tr>
<td>Adobe®RGB SIM.</td>
<td>Factory setting. Provides a standard color space used in high-end graphics applications such as professional digital still cameras and imaging.</td>
</tr>
<tr>
<td>eciRGB_v2 SIM.</td>
<td>Provides a color space profile recommended by ECI (The European Color Initiative).</td>
</tr>
<tr>
<td>DCI SIM.</td>
<td>Color setting for digital cinema.</td>
</tr>
<tr>
<td>REC-Bt709</td>
<td>Color setting for High-definition television.</td>
</tr>
<tr>
<td>HIGH BRIGHT</td>
<td>Highest brightness setting.</td>
</tr>
<tr>
<td>FULL</td>
<td>Native display color gamut. Suitable for use with color managed applications.</td>
</tr>
<tr>
<td>DICOM SIM.</td>
<td>Setting that conforms to the DICOM standard for the Grayscale Standard Display Function.</td>
</tr>

<td>PROGRAMMABLE</td>
<td>For “MultiProfiler” software or the Hardware Calibration settings by NEC Display Solutions software (some OSD settings are disabled).</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>MODE</th>
<th>PURPOSE</th>
</tr>
</thead>
<tbody>
<tr>
<td>LUMINANCE</td>
<td>Adjusts the overall image and screen background brightness. Press “LEFT” or “RIGHT” to adjust.</td>
</tr>
<tr>
<td>WHITE</td>
<td>Adjusts the white color by temperature or xy setting. A lower color temperature will make the screen reddish and a higher color temperature will make the screen bluish. A stronger x makes the screen reddish, a stronger y makes it greenish and weak xy makes it a bluish white.</td>
</tr>
</tbody>
</table>
GAMMA

Allows you to manually select the brightness level of grayscale. There are five selections: sRGB, L STAR, DICOM SIM. and CST. We recommend to show grayscale image data on screen.

sRGB: GAMMA setting for sRGB.
L STAR: GAMMA setting for Lab color space.
DICOM SIM.: DICOM GSDF (Grayscale Standard Display Function) is typically used for medical imaging.
CST: CUSTOM VALUE can be adjusted when CST is selected as the GAMMA SELECTION setting.
CUSTOM VALUE: The gamma value is selected from the rate of 0.5 to 4.0 by 0.1 steps.

BLACK

Adjusts the black luminance.

RED GREEN BLUE

Adjusts color gamut.

COLOR VISION EMU

Previews various typical human vision deficiencies and is useful for evaluating how people who have such deficiencies will perceive colors. This preview is available in four modes: Types P (Protanopia), D (Deuteranopia) and T (Tritanopia) emulate color vision dichromacy, and Grayscale can be used for evaluating contrast legibility.

NOTE: Depending on the vision of the user, including those with color vision deficiency, there will be a variation in how the screen's color is seen and experienced. A simulation is used to illustrate the view of those with a color vision deficiency. It is not their actual view. The simulation is a reproduction of those with a strong color vision mode of type P, type D or type T. People with a slight color vision deficiency will experience little to no difference compared to those with normal color vision.

UNIFORMITY

This function electronically compensates for the slight variations in the white uniformity level as well as for deviations in color that may occur throughout the display area of the screen. These variations are characteristic of LCD panel technology. This function improves the color and evens out the luminance uniformity of the display.

NOTE: A higher number produces a better effect, but may also reduce CONTRAST RATIO.

METAMERISM

Compensates the visual color difference with the other displays. If you prefer to get closer display color to the picture mode setting, set to OFF.

NOTE:
- When the selected PICTURE MODE is different from your computer’s ICC color profile, you may experience inaccurate color reproduction.
- MultiProfiler software, developed by NEC Display Solutions, is highly recommended to provide extended color management features such as ICC profile Emulation and Printer Emulation. The latest MultiProfiler software is available on the NEC Display Solutions website.
**SPECTRAVIEW ENGINE** is “OFF”:
Selects five picture modes by Picture mode in OSD menu or using Picture mode button on the wireless remote control.

DVI1, DVI2, DPORT, OPTION*, PRESET1*1, PRESET2*1

| **AUDIO DELAY** | Enables to set the delay time to output the audio.  
DELAY TIME can be set between 0 and 100 milliseconds. "ON" activates this function. |
| **RESET** | Resets “AUDIO” options back to factory settings except VOLUME. |
| **SCHEDULE** | Sets the monitor to power off after a length of time.  
A time between 1 to 24 hours is available. |
| **OFF TIMER** | OFF/1 HOUR |
| **SCHEDULE SETTINGS** | Creates a working schedule for the monitor to use. |

*1: This function depends on which option board you use.
| **SCHEDULE LIST** | List of schedules. |
| **DATE & TIME** | Sets the date, time, and daylight saving region. Date & time must be set in order for the “SCHEDULE” function to operate. See page 32. |
| **YEAR** | Configures the year for the real-time clock. |
| **MONTH** | Configures the month for the real-time clock. |
| **DAY** | Configures the day for the real-time clock. |
| **TIME** | Configures the time for the real-time clock. |
| **DAYLIGHT SAVING** | Configures daylight savings on or off. |
| **RESET** | Resets the following settings within the SCHEDULE menu back to factory setting: OFF TIMER, SCHEDULE SETTINGS. |

**MULTI PICTURE CONTROL**

**KEEP MULTI PICTURE MODE**
Allows the monitor to remain in MULTI PICTURE and TEXT TICKER mode after powering off. When Power is returned, MULTI PICTURE and TEXT TICKER appear without having to enter the OSD.

**MULTI PICTURE MODE**
Selects picture number and display form. NOTE: This function is released when selecting SUPER in INPUT CHANGE, SCREEN SAVER, INPUT CONFIGURATION, IMAGE FLIP except for NONE. When this function is “ON”, STILL, POINT ZOOM are not available.

**MULTI PICTURE**
When “OFF” is selected one picture is displayed. When “ON” is selected several pictures are displayed.

**PICTURE NUMBER**
Selects [2 PICTURES], [3 PICTURES], [4 PICTURES]. After selected PICTURE NUMBER, select display form PIP, PBP1, PBP2, or PBP3. Depending on the setting at PICTURE NUMBER, display form selection is changed. See page 17.

**ACTIVE PICTURE**
When MULTI PICTURE is “OFF”, [PICTURE 1] is Active Picture. When MULTI PICTURE is “ON”, sets Active Picture. NOTE: This function depends on MULTI PICTURE setting.

**INPUT SELECT**
Selects Multi Picture input. Press the + button or - button to select input. NOTE: This function is not available when MULTI PICTURE is “OFF”. Press SET button after selecting Active Picture input.

**PICTURE SIZE**
Sets Active Picture size. Press the SET/POINT ZOOM button to adjust picture size. Press + or CH+ to expand. Press - or CH- to reduce. NOTE: This function is not available when MULTI PICTURE is 4 PICTURES PBP. Depends on the setting at MULTI PICTURE MODE, some picture cannot change it’s size.

**PICTURE POSITION**
Sets Active Picture location. Pressing the + button moves Active Picture to the right, and pressing the - button moves it to the left. Pressing the ▲ button moves Active Picture up, and pressing the ▼ button moves it down. NOTE: This function is not available when MULTI PICTURE is 4 PICTURES PBP.

**PICTURE ASPECT**
Selects Active Picture frame aspect, [FULL], [NORMAL] and [EXPAND]. To change aspect ratio of the screen image, see page 17. NOTE: This function depends on MULTI PICTURE setting.

**ROTATE**
When “ON” is selected, all pictures rotate. When “OFF” is selected, sets each picture ROTATE settings. NOTE: When TEXT TICKER, IMAGE FLIP except for NONE, STILL is ON or SCREEN SAVER is active, this function is not available. If ASPECT “1:1” is selected, characters and lines may be displayed in blurring, depending on the signal resolution.

When rotate is ON, POINT ZOOM and IMAGE FLIP except for NONE are not available. Each picture ROTATE settings are released when MULTI PICTURE is set to “OFF”. When input signal is Interface, the image may be disturbed. If input signal is 3840 x 2160 60 Hz and [3 PICTURES], [4 PICTURES] is selected at PICTURE NUMBER in MULTI PICTURE MODE, ROTATE is not available. If ROTATE of MULTI PICTURE CONTROL is selected in the input signal with a high refresh rate, the image may not be displayed smoothly. To reduce this condition, please set the input signal with a low refresh rate.

---

*1: This function is released when selecting SUPER in INPUT CHANGE, SCREEN SAVER, INPUT CONFIGURATION, IMAGE FLIP except for NONE.

*2: When TEXT TICKER is active, this function is not available.

The monitor will not look for other video signals while the current video source is present.</td>
<td>NONE</td>
</tr>
<tr>
<td>LAST DETECT</td>
<td>Corresponding option only* When the monitor is displaying a signal from the current source and a new secondary source is supplied to the monitor, the monitor will automatically switch to the new video source. When current video input signal is not present, the monitor searches for a video signal from the other video input port. The monitor will not look for other video signals while the current video source is present.</td>
<td>NONE</td>
</tr>
<tr>
<td>CUSTOM DETECT</td>
<td>Set the priority of input signals. When CUSTOM DETECT is selected, monitor searches listed inputs only.</td>
<td>NONE</td>
</tr>
</tbody>
</table>

### LONG CABLE COMP
Compensates for image degradation caused by using a long cable. A lower number produces less compensation.
- NOTE: LONG CABLE COMP does not compensate signal with DisplayPort cable.

### INPUT CHANGE
Sets input change speed. When selected “SUPER”, allows to switch high-speed between set two signals. NOTE: When “QUICK” is selected, picture may be distorted when signal input is changed. When INPUT CONFIGURATION is ACTIVE, “SUPER” is not available.
- When “SUPER” is active, MULTI PICTURE MODE, TEXT TICKER, STILL, POINT ZOOM are not available. This function should be chosen after all adjustment options have been made for the input.

### TERMINAL SETTINGS

| HDMI/DVI SELECT | Selects input terminal sources [HDMI], [DVI] or [HDMI/DVI]. NOTE: Selected input only displays. DVI signal is not displayed by factory setting. To display DVI signal, set to “HDMI/DVI” or “DVI”. | HDMI |
| INPUT CONFIGURATION | Selects input sources. See page 18. When this function is “ON”, MULTI PICTURE MODE, TEXT TICKER, SCREEN SAVER, STILL, POINT ZOOM, SUPER in INPUT CHANGE, ZOOM in ASPECT are not available. | OFF |
| HDMI | Selects “ON” or “OFF” the multi input sources [HDMI x 4 (PRESET1)], [HDMI x 2 (PRESET1)], [HDMI x 2 (PRESET2)].
- HDMI x 4 (PRESET1): When [HDMI x 2 (PRESET1)] is set, [HDMI x 4 (PRESET1)] is disable.
- HDMI x 2 (PRESET1): When [HDMI x 2 (PRESET1)] is set, [HDMI x 4 (PRESET1)] is disable.
- HDMI x 2 (PRESET2): When [HDMI x 2 (PRESET2)] is set, [HDMI x 2 (PRESET2)] is disable. | OFF |
| DVI | Selects “LEFT & RIGHT” or “TOP & BOTTOM” the multi input sources [DVI x 2 (PRESET1)]. | OFF |
| HDMI/DVI | Selects “LEFT & RIGHT” the multi input sources [HDMI x 2 (PRESET1)]. | OFF |
| DVI MODE | Selects the kind of DVI-D equipment which is connected to the DVI input. Select “DVI-HD” when DVD player or computer equipment, which requires HDCP authentication, is connected. Select “DVI-PC” when computer equipment, which not requires HDCP authentication, is connected. | DVI-HD |
| DisplayPort | Selects DisplayPort mode [1.1a] or [1.2]. (If the input resolution is higher than a 3840 x 2160 resolution, the image will be scaled down to fit the screen). | 1.2 |
| BIT RATE | If DisplayPort 1.1a is selected, you can set [RBR] or [HBR]. If DisplayPort 1.2 is selected, you can set [RBR], [HBR] or [HBR2]. NOTE: This function depends on DisplayPort setting. | HBR, HBR2 |
| HDMI SIGNAL | RAW: For computer setting. Displays all input signals of 0-255 steps. EXPAND: For audio-visual equipment setting. Expands input signals of 16-235 steps to 0-255 steps. | EXPAND |

*1: This function depends on which option board you use.
DEINTERLACE
Selects the IP (Interlace to Progressive) conversion function.
NOTE: For DVI input “DVI-HD” needs to be enabled in the DVI mode menu.

ON
Converts interlaced signals to progressive. This is the default setting.

OFF
Disables IP conversion. This setting is best suited for motion pictures, but increases the risk of image retention.

MOVIE SETTINGS
Selects suitable settings for Movie.

TELECINE
Automatically senses the sources frame rate for optimal picture quality.

ADAPTIVE CONTRAST
Sets the level of adjustment for dynamic contrast.

OVER SCAN
Some video formats may require different scanning modes in order to best display the image.

ON
Image size is larger than what can be displayed. The image edge will appear cropped. Approximately 95% of the image will be shown on the screen.

OFF
Image size stays within the display area. The whole image is displayed on the screen.
NOTE: When you use a computer with HDMI out, please set “OFF”.

AUTO
Sets scanning modes automatically.

OPTION SETTINGS
You can set this setting when option board accessory is connected to the monitor. Please contact your supplier for detailed information about Option board slot accessories.

OPTION POWER
Allow the monitor to supply power to Option board slot during power save mode or standby mode.
NOTE: This function should be set to ON when using power save management by slot 2 type option.

AUDIO
The function is available for slot 2 type option. Selects sound input signal according to slot2 type option’s specifications. To activate DIGITAL, select OPTION for input signal and OPTION for AUDIO INPUT.
NOTE: DIGITAL is activated only when OPTION is selected for input signal and OPTION for AUDIO INPUT.

INTERNAL PC
The function is available for slot 2 type PC.

WARNING
If OPTION POWER is OFF, a warning message appears when monitor power is turned off.
NOTE: Warning message does not appear when monitor power is turned off by OFF TIMER setting or SCHEDULE setting.

AUTO OFF
Monitor power is automatically “OFF” when connected PC is OFF or the monitor is in power save mode.
NOTE: Monitor power is not automatically “ON” when connected PC is ON.

START UP PC
When ON is selected, connected PC start-up.

FORCE QUIT
When ON is selected, it performs force-quit PC.
Please use this function only when the operating system cannot be shut down manually.

120Hz
(TOUCH PANEL)

RESET
Resets the following settings within the ADVANCED OPTION1 menu back to factory setting:
INPUT DETECT (priority of input signals only), INPUT CHANGE (except for INPUT1 and INPUT2), TERMINAL SETTINGS, DEINTERLACE, MOVIE SETTINGS, OVER SCAN, AUDIO in OPTION SETTINGS.

*1: If SPECTRAVIEW ENGINE is ON, this function is grayed out.
*2: This function depends on INPUT CONFIGURATION setting.
*3: Depends on signal input.

</tbody>
</table>

*1: If SPECTRAVIEW ENGINE is ON, this function is grayed out.

*1: This function depends on which option board you use.

*2: This function depends on INPUT CONFIGURATION setting.

*3: The function is available only when connecting the optional control unit.
NOTE 1: CREATING A SCHEDULE

The schedule function allows the display to be set to power on and off at different times. Up to seven different schedules can be programmed.

To program the schedule:

1. Enter the SCHEDULE menu. Highlight SCHEDULE SETTINGS using the up and down buttons. Press the SET/POINT ZOOM or the + button to enter the Settings menu. Highlight the desired schedule number and press SET/POINT ZOOM. The box next to the number will turn yellow. The schedule can now be programmed.

2. Use the down button to highlight the hours setting in the ON time slot. Use the + and - buttons to set the hour. Use the up and down buttons to highlight the minutes setting. Use the + and - buttons to set the minutes. Set the OFF time in the same manner.

3. Use the up and down arrows to highlight INPUT. Use the + and - buttons to choose the input source. Use the up and down arrows to highlight PIC. MODE. Use the + and - buttons to choose the picture mode.

4. Use the down button to select a day on which the schedule will be enabled. Push the SET/POINT ZOOM button to enable. If the schedule is to be ran every day, choose EVERY DAY and press the SET/POINT ZOOM button. The circle next to EVERY DAY will turn yellow. If a weekly schedule is desired, choose the days of the week using the up and down buttons and pressing SET/POINT ZOOM to select. Then highlight the EVERY WEEK option and press SET/POINT ZOOM.

5. After a schedule is programmed the remaining schedules can then be set. Press MENU to leave the OSD or press EXIT to go back to the previous menu.

NOTE: If schedules are overlapping then the schedule with the highest number will have priority over the schedule with the lowest number. For example schedule #7 will have priority over schedule #1.

If selected input or picture mode is not available now, disable input or picture mode is shown in red.

NOTE 2: IMAGE PERSISTENCE

Please be aware that LCD Technology may experience a phenomenon known as Image Persistence. Image Persistence occurs when a residual or “ghost” image of a previous image remains visible on the screen. Unlike CRT monitors, LCD monitors’ image persistence is not permanent, but constant images being displayed for a long period of time should be avoided.

To alleviate image persistence, turn off the monitor for as long as the previous image was displayed. For example, if an image was on the monitor for one hour and a residual image remains, the monitor should be turned off for one hour to erase the image.

As with all personal display devices, NEC DISPLAY SOLUTIONS recommends displaying moving images and using a moving screen saver at regular intervals whenever the screen is idle or turning off the monitor when not in use.

Please set “SCREEN SAVER”, “DATE & TIME” and “SCHEDULE SETTINGS” functions to further reduce the risk of Image persistence.

For long life use as Public Display

Image Sticking of LCD Panel

When an LCD panel is operated continuously for long hours, a trace of electric charge remains near the electrode inside LCD, and residual or “ghost” image of previous image may be observed. (Image Persistence)

Image Persistence is not permanent, but when fixed image is displayed for long period, ionic impurities inside LCD are accumulated along the displayed image, and may be permanent. (Image Sticking)

Recommendations

To prevent Image Sticking, and for longer life usage of LCD, the following are recommended.

1. Fixed image should not be displayed for long period. Change fixed images after short intervals.

2. When not in use, please turn off the monitor by remote control, or use Power Management or use Schedule Functions.

3. Lower environmental temperatures prolong the lifespan of the monitor.

   When Protective surface (glass, acrylic) is installed over the LCD surface, the LCD surface is located in an enclosed space, the monitor are stacked, utilize the temperature sensors inside monitor.

   To reduce the environmental temperature, use the Cooling Fan, Screen Saver and Low Brightness.

4. Please use “Screen Saver Mode” of monitor.
REMOTE CONTROL ID FUNCTION

REMOTE CONTROL ID

The remote control can be used to control up to 100 individual MultiSync monitors using what is called the REMOTE CONTROL ID mode. The REMOTE CONTROL ID mode works in conjunction with the Monitor ID, allowing control of up to 100 individual MultiSync monitors. For example: if there are many monitors being used in the same area, a remote control in normal mode would send signals to every monitor at the same time (see Figure 1). Using the remote in REMOTE CONTROL ID mode will only operate one specific monitor within the group (see Figure 2).

TO SET REMOTE CONTROL ID

While holding down the REMOTE ID SET button on the remote control, use the KEYPAD to input the Monitor ID (1-100) of the display to be controlled via remote. The remote can then be used to operate the monitor having that specific Monitor ID number. When 0 is selected or when the remote control is in normal mode, all monitors will be operated.

TO SET/RESET REMOTE CONTROL MODE

ID Mode - To enter ID Mode press the REMOTE ID SET button and hold down for 2 seconds.
Normal Mode - To return to Normal Mode press the REMOTE ID CLEAR button and hold down for 2 seconds.

In order for this feature to work properly, the display must be assigned a Monitor ID number. The Monitor ID number can be assigned under the MULTI DISPLAY menu in the OSD (See page 27).

Point the remote control towards the remote sensor of the desired monitor and press the REMOTE ID SET button. The MONITOR ID number is shown on the display when your remote control is in ID mode.

Use the remote control to operate a monitor that has a specific MONITOR ID number assigned to it.

1. Set the MONITOR ID number for the display (See page 27). The MONITOR ID number can range from 1-100.
   This MONITOR ID number allows the remote control to operate this specific monitor without affecting other monitors.

2. On the remote control, press and hold down the REMOTE ID SET button while using the keypad to input the REMOTE CONTROL ID number (1-100). The REMOTE ID NUMBER should match the MONITOR ID number of the display to be controlled. Choose “0” to simultaneously control all displays in range.

3. Point the remote control towards the remote sensor of the desired monitor and press the REMOTE ID SET button. The MONITOR ID number is shown in red on the display.
   If the REMOTE CONTROLID is “0”, then all displays in range will show their respective MONITOR ID number in red.
   If the MONITOR ID number is shown in white on the display, the MONITOR ID number and the REMOTE CONTROL ID are not the same.

NOTE: GROUP ID cannot be specified via the remote control.
Multiple Monitors Connection

You can control multiple monitors by using RS-232C, REMOTE IN or LAN daisy-chain connection.

**NOTE:** Multiple monitors that are daisy-chained have a limit to the connectable monitors. When manually specify the ID number or control by the specified ID number, please execute AUTO ID (see page 27) previously.

Connection
Controlling the LCD monitor via RS-232C Remote Control

This LCD monitor can be controlled by connecting a personal computer with a RS-232C (reverse type) terminal.

Functions that can be controlled by a personal computer are:
• Power ON or OFF.
• Switching between input signals.
• Sound Mute ON or OFF.

Connection

LCD Monitor + computer

NOTE: If your computer is equipped only with a 25-pin serial port connector, a 25-pin serial port adapter is required. Contact your dealer for details.

For the pin assignment, please see “2) RS-232C input/output” below.

To control a monitor, please use the control command. Instructions for the control command can be found on the CD included with the display. The file is called “External_control.pdf”.

1) Interface

<table>
<thead>
<tr>
<th>Protocol</th>
<th>RS-232C</th>

Connecting to a Network
Using a LAN cable allows you to specify the Network Settings and the Alert Mail Settings by using an HTTP server function.
To use a LAN connection, you are required to assign an IP address.
Example of LAN connection:

NOTE: Use a category 5 or higher LAN cable.

---

Network Setting by Using an HTTP Browser

Overview
Connecting the monitor to a network allows for monitor control from a computer via the network.
To perform the monitor control from a web browser, you must have an exclusive application installed on your computer.
The IP address and subnet mask of the monitor can be set on the Network Setting screen of the web browser by using an HTTP server function. Please be sure to use “Microsoft Internet Explorer 7.0” or a higher version for the web browser.
(This device uses “JavaScript” and “Cookies” and the browser should be set to accept these functions. The setting method will vary depending on the version of browser. Please refer to the help files and the other information provided in your software.)

Access is gained to the HTTP server function by starting the Web browser on the computer via the network connected to the monitor and entering the following URL.

Network Setting
http://<the Monitor's IP address>/index.html

TIP: The default IP address is assigned automatically to the monitor.
The exclusive application can be downloaded from our website.

NOTE: If the MONITOR NETWORK SETTINGS screen does not appear in the web browser, press the Ctrl+F5 keys to refresh your web browser (or clear the cache).
The display or button's response can be slowed down or operation may not be accepted depending the settings of your network. Should this happen, consult your network administrator.
The LCD monitor may not respond if its buttons are repeatedly pressed in rapid intervals. Should this happen, wait a moment and repeat. If you still can’t get a response, turn the monitor off and then back on.

To control a monitor please use the control command. See "Control command diagram" (page 36).
Preparation Before Use
Connect the monitor to a commercially available LAN cable before engaging in browser operations.

Operation with a browser that uses a proxy server may not be possible depending on the type of proxy server and the setting method. Although the type of proxy server will be a factor, it is possible that items that have actually been set will not be displayed depending on the effectiveness of the cache, and the contents set from the browser may not be reflected in operation. It is recommended that a proxy server not be used unless it is unavailable.

Handling of the Address for Operation via a Browser
The host name can be used under the following cases:
If the host name corresponding to the IP address of the monitor has been registered to the domain name server (DNS) by the network administrator, you can then access the network settings of the display via that registered host name using a compatible browser.
If the host name corresponding to the IP address of the monitor has been configured in the “HOSTS” file of the computer being used, you can then access the network settings of the display via that host name using a compatible browser.

Example 1: When the host name of the monitor has been set to “pd.nec.co.jp”, access is gained to the network setting by specifying http://pd.nec.co.jp/index.html for the address or the entry column of the URL.

Example 2: When the IP address of the monitor is “192.168.73.1”, access is gained to the mail alert settings by specifying http://192.168.73.1/index.html for the address or the entry column of the URL.

Operation
Access the following address to show HOME. Click each link on the left side of HOME.
http://<the Monitor’s IP address>/index.html

REMOTE CONTROL
Enable to control equivalent as the remote control key.

OSD menu
Enable to set the following OSD menu.
PICTURE, ADJUST, AUDIO, SCHEDULE, MULTI PICTURE CONTROL, OSD, MULTI DISPLAY, DISPLAY PROTECTION, EXTERNAL CONTROL, ADVANCED OPTION1, ADVANCED OPTION2.

NOTE: Function of buttons which are shown on setting pages.
[APPLY]: Reflect your settings.
[CANCEL]: Return to the previous settings. NOTE: CANCEL is disabled after clicking APPLY.
[RELOAD]: Reload the settings.
[RESET]: Resets to the initial setting.
Network Setting
Click “NETWORK” on the left side of HOME.

<table>
<thead>
<tr>
<th>NETWORK SETTING</th>

</tr>
</tbody>
</table>

IP SETTING: Set for IP ADDRESS SETTINGS.
AUTO: Automatically assign an IP address.
MANUAL: Set your IP address of the network connected to the monitor.
NOTE: Consult your network administrator for the IP address when [AUTO] is selected for [IP SETTING].

IP ADDRESS: Set your IP address of the network connected to the monitor when [MANUAL] is selected for [IP SETTING].

SUBNET MASK: Set your subnet mask number of the network connected to the monitor when [MANUAL] is selected for [IP SETTING].

DEFAULT GATEWAY: Set your default gateway of the network connected to the monitor when [MANUAL] is selected for [IP SETTING].
NOTE: Set as [0.0.0.0] to delete the setting.
A blank is not incongruent when all the segments are blank.

DNS: Set for IP ADDRESS SETTINGS of DNS server.
AUTO: Automatically assign an IP address of DNS server connected to the monitor.
MANUAL: Set your IP address of DNS server connected to the monitor.

PRIMARY DNS: Set your primary DNS settings of the network connected to the monitor.
NOTE: Set as [0.0.0.0] to delete the setting.
A blank is not incongruent when all the segments are blank.

SECONDARY DNS: Set your secondary DNS settings of the network connected to the monitor.
NOTE: Set as [0.0.0.0] to delete the setting.

NOTE: The following settings will reset back to the factory setting when “IP ADDRESS RESET” is selected by an EXTERNAL CONTROL of OSD:
[IP SETTING]: AUTO, [IP ADDRESS]: 192.168.0.10, [SUBNET MASK]: 255.255.255.0, [DNS]: AUTO [DEFAULT GATEWAY], [PRIMARY DNS] and [SECONDARY DNS] are blank.
This option notifies your computer of an error message via e-mail when using wired LAN. An error message notification will be sent when an error occurs in the monitor.

### ALERT MAIL
Checking [ENABLE] will turn on the Alert Mail feature. Checking [DISABLE] will turn off the Alert Mail feature.

### STATUS MESSAGE
Checking [ENABLE] will turn on the STATUS MESSAGE feature. Checking [DISABLE] will turn off the STATUS MESSAGE feature.

### SENDER’S ADDRESS
Type in the sender’s address. Up to 60 alphanumeric and symbols characters can be used.

### SMTP SERVER
Type in the SMTP server name to be connected to the monitor. Up to 60 alphanumeric characters can be used.

### RECIPIENT’S ADDRESS 1 TO 3
Type in your recipient’s address. Up to 60 alphanumeric and symbols characters can be used.

### AUTHENTICATION METHOD
This selects the authentication method of the e-mail transmission.

### POP3 SERVER
This specifies the address of the POP3 server that is used in the authentication of the e-mail.

### USER NAME
This sets the user name for logging into the authentication server when authentication is required for the e-mail transmission. Up to 60 alphanumeric characters can be used.

### PASSWORD
This sets the password for logging into the authentication server when authentication is required for the e-mail transmission. Up to 60 alphanumeric characters can be used.

### TEST MAIL
Click this button to send a test mail to check if your settings are correct.

**NOTE:**
- If you execute a test, you may not receive an Alert mail. Should this happen, check if the network settings are correct.
- If you entered an incorrect address in a test, you may not receive an Alert mail. Should this happen, check if the Recipient’s Address is correct.

**TIP:** For Control command diagram, please see file “External_Control.pdf” on the CD-ROM.
### Alert error message list

```
SNMP Setting
Click “SNMP” on the left side of HOME.

This function allows for getting status and controlling of a monitor via the network.

Version:
SNMP v1    Authenticated plaintext by community name, not return a confirmation message of Trap.
SNMP v2c   Authenticated plaintext by community name, return a confirmation message of Trap.

Community name:
The default setting of community name is “public”. It is read only. You can set community names for up to 3 settings.

Trap:
Sending error message to specified address when an error occurs in the monitor.

AMX Setting

Click “AMX” on the left side of HOME.

**AMX BEACON**

Turn on or off for detection from AMX Device Discovery when connecting to the network supported by AMX’s NetLinx control system.

**TIP:**

When using a device that supports AMX Device Discovery, all AMX NetLinx control system will recognize the device and download the appropriate Device Discovery Module from an AMX server. Checking [ENABLE] will detect the device from AMX Device Discovery. Checking [DISABLE] will not detect the device from AMX Device Discovery.

---

CRESTRON Setting

Click “CRESTRON” on the left side of HOME.

**CRESTRON ROOMVIEW compatibility**

The monitor supports CRESTRON ROOMVIEW, allowing multiple devices connected in the network to be managed and controlled from a computer or a controller.

For more information, visit [http://www.crestron.com](http://www.crestron.com)

<table>
<thead>
<tr>
<th>ROOMVIEW</th>

<tr>
<td>IP ID</td>
<td>Set your IP ID of CRESTRON SERVER.</td>
</tr>
</tbody>
</table>

**TIP:** The CRESTRON settings are required only for use with CRESTRON ROOMVIEW.

For more information, visit [http://www.crestron.com](http://www.crestron.com)
Name Setting

Click “NAME” on the left side of HOME.

MONITOR NAME
Set a monitor name. The name must be 16 characters or less. The default is model name.

HOST NAME
Type in the hostname of the network connected to the monitor. Up to 15 alphanumeric characters can be used.

DOMAIN NAME
Type in the domain name of the network connected to the monitor. Up to 60 alphanumeric characters can be used.

Network Password Setting

Click “NETWORK PASSWORD” on the left side of HOME.

PJLink PASSWORD
Set a password for PJLink*. A password must be 32 characters or less. Do not forget your password. However, if you forget your password, consult with your dealer.

HTTP PASSWORD
Set a password for HTTP server. A password must be 10 characters or less.

HTTP PASSWORD ENABLE
HTTP PASSWORD is required when logging in HTTP server. Set a monitor name as USER NAME when inputting the password.

*What is PJLink?
PJLink is a standardization of protocol used for controlling devices of different manufacturers. This standard protocol is established by Japan Business Machine and Information System Industries Association (JBMIA) in 2005.

The device supports all the commands of PJLink Class 1.
Setting of PJLink will not be affected even when [RESET] is done from the menu.
PD List Information
Click “PD LIST” on the left side of HOME.

Show the list of ID and IP address of multiple monitors that are daisy-chained.
Only the master monitor can show the list.

Memo Setting
Click “MEMO” on the left side of HOME.

Set a title and message.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>TITLE</td>
<td>A title must be 24 characters or less.</td>

</tr>
<tr>
<td>MEMO PASSWORD ENABLE</td>
<td>MEMO PASSWORD is required when setting MEMO.</td>
</tr>
</tbody>
</table>
Using “SET/POINT ZOOM” button on a remote control allows to enlarge a partial of image. Press CH+/- button to zoom up or down. The image can be expanded from 1 to 10 times.

1. Press [SET/POINT ZOOM] button on a remote control. An icon will be a magnifier.
2. Move magnifier icon by [▲] [▼] [+][-] button.
4. Press [SET/POINT ZOOM] to disappear the icon.
5. Press [EXIT] to return to a normal size.
6. Press [MENU] to display OSD menu.<Setting Procedure>

NOTE:
- The image may be distorted during this function.
- This function does not work when set to IMAGE FLIP except for NONE, MULTI PICTURE MODE, SCREEN SAVER, SUPER in INPUT CHANGE, INPUT CONFIGURATION, ROTATE, TEXT TICKER.
- When selected DYNAMIC or ZOOM in ASPECT, the image will be changed FULL, then start to POINT ZOOM. After POINT ZOOM, the ASPECT will be returned previous ASPECT settings. When the ASPECT is changed during POINT ZOOM, DYNAMIC and ZOOM will be full image.
- The magnifier icon does not move to no image area.
- POINT ZOOM will be released after changing input signal or power off.
- POINT ZOOM will be released when changing ASPECT setting during POINT ZOOM.
- When this function is active, STILL is not available.
- POINT ZOOM is not available with 3840 x 2160 (60 Hz) signal.

PROOF OF PLAY

This function allows to send message for the current status of monitor by self checking.

<table>

NOTE: For Proof of Play function, please see “External_Control.pdf” on the CD-ROM.
INTELLIGENT WIRELESS DATA

This function allows to get the data of monitor's status by wireless communication even while the monitor is off. Some menu of OSD, you can set by this function.

**NOTE:** Sensor position: See page 9. Please contact your supplier for detailed information.

Features

Reduced Footprint: Provides the ideal solution for environments with superior image quality.

SPECTRAVIEW ENGINE: This system is designed for professionals with color-critical applications. Each display screen is calibrated at factory. By making adjustments directly in the display hardware, optimal settings are configured without any user interaction.

OmniColor: Combines Six-axis color control and the sRGB standard. Six-axis color control permits color adjustments via six axes (R, G, B, C, M and Y) rather than through the three axes (R, G and B) previously available. The sRGB standard provides the monitor with a uniform color profile. This assures that the colors displayed on the monitor are exactly the same as on the color printout (with sRGB supporting operating system and sRGB printer). This allows you to adjust the colors on your screen and customise the color accuracy of your monitor to a variety of standards.

sRGB Color Control: A new optimized color management standard which allows for color matching on computer displays and other peripherals. The sRGB standard, which is based on a calibrated color space, allows for optimal color representation and backward compatibility with other common color standards.

OSD (On-Screen-Display) Controls: Allow you to quickly and easily adjust all elements of your screen image via simple to use on-screen menus.

Plug and Play: The Microsoft® solution with the Windows® operating system facilitates setup and installation by allowing the monitor to send its capabilities (such as screen size and resolutions supported) directly to your computer, automatically optimizing display performance.

IPM (Intelligent Power Manager) System: Provides innovative power-saving methods that allow the monitor to shift to a lower power consumption level when on but not in use, saving two-thirds of your monitor energy costs, reducing emissions and lowering the air conditioning costs of the workplace.

FullScan Capability: Allows you to use the entire screen area in most resolutions, significantly expanding image size.

VESA Standard (FDMIv1) Mounting Interface: Allows you to connect your LCD monitor to any VESA standard (FDMIv1) third party mounting arm or bracket. NEC recommends using mounting interface that comply with TÜV-GS and/or UL1678 standard in North America.

DVI-D: The digital-only subset of DVI ratified by the Digital Display Working Group (DDWG) for digital connections between computers and displays. As a digital-only connector, analog support is not provided for a DVI-D connector. As a DVI-based digital only connection, only a simple adapter is necessary for compatibility between DVI-D and other DVI-based digital connectors such as DFP and P&D. The DVI interface of this display supports HDCP. The DVI interface of this display supports DVI Dual Link.

Zoom: Expands/reduces image size for horizontal and vertical direction.

Self-diagnosis: If an internal error should occur, a failure state will be indicated.

USB hub adds excitement to your computing by connecting you to digital cameras, scanners and more.

HDCP (High-bandwidth Digital Content Protection): HDCP is a system for preventing illegal copying of video data sent over a Digital Visual Interface (DVI). If you are unable to view material via the DVI input, this does not necessarily mean the display is not functioning properly. With the implementation of HDCP, there may be cases in which certain content is protected with HDCP and might not be displayed due to the decision/intention of the HDCP community (Digital Content Protection, LLC).

Option board slot: You can use an option board. Please contact your supplier for detailed information.
Troubleshooting

No picture
• The signal cable should be completely connected to the display card/computer.
• The display card should be completely seated in its slot.
• Check the main Power Switch, it should be in the ON position.
• Power Switch and computer power switch should be in the ON position.
• Check to make sure that a supported mode has been selected on the display card or system being used.
• (Please consult display card or system manual to change graphics mode.)
• Check the monitor and your display card with respect to compatibility and recommended settings.
• Check the signal cable connector for bent or pushed-in pins.
• The monitor automatically goes into OFF at the preset time period after signal is lost. Press the power button.
• Check the DVI MODE setting when DVD player or computer equipment is connected to the DVI input.
• Check HDMI/DVI SELECT setting.
• Check the DVI cable you use. If input resolution is 1920 x 2160 or 3840 x 2160, DVI Dual Link cable needs to be used.

Snowy Picture, Black Screen in DVI input
• Check the DVI MODE setting when DVD player or computer equipment is connected to the DVI input.

Power Button does not respond
• Unplug the power cord of the monitor from the AC outlet to turn off and reset the monitor.
• Check the main Power Switch of the monitor.

Image persistence
• Please be aware that LCD Technology may experience a phenomenon known as Image Persistence. Image Persistence occurs when a residual or “ghost” image of a previous image remains visible on the screen. Unlike CRT monitors, LCD monitors’ image persistence is not permanent, but constant images being displayed for a long period of time should be avoided. To alleviate image persistence, turn off the monitor for as long as the previous image was displayed. For example, if an image was on the monitor for one hour and a residual image remains, the monitor should be turned off for one hour to erase the image.

NOTE: As with all personal display devices, NEC DISPLAY SOLUTIONS recommends displaying moving images and using a moving screen saver at regular intervals whenever the screen is idle or during breaks in normal use.

Image is blinking
• If you use a repeater, distributor, long cable, this may cause image roughness or blink for a moment. Please set the LONG CABLE COMP in that case. If the state of the screen is not improved, please connect the cable to the monitor directly without using a repeater or a distributor, or replace the cable of use.
• Some HDMI cable may not display an image correctly. If input resolution is 1920 x 2160, 3840 x 2160 or 4096 x 2160, please use the HDMI cable that supports 4K resolution.

LED on monitor is not lit
(no green or red color can be seen)
• Power Switch should be in the ON position and power cord should be connected.
• Check the main Power Switch, it should be in the ON position.
• Make certain the computer is not in a power-saving mode (touch the keyboard or mouse).
• Check to see that the power indicator option in the OSD is set to ON.

RED LED on monitor is blinking
• A certain failure might have occurred, please contact your nearest authorized NEC DISPLAY SOLUTIONS service facility.
• If the monitor is powered off by the inside temperature being higher than the normal operating temperature, a RED LED will blink six times. Power on the display again after confirming the inside temperature has been reduced to normal operation temperature.

Display image is not sized properly
• Use the OSD Image Adjust controls to increase or decrease the coarse adjustment.
• Check to make sure that a supported mode has been selected on the display card or system being used.
• (Please consult display card or system manual to change graphics mode).

No Sound
• Check to see if audio cable is properly connected.
• Check to see if mute is activated.
• Check to see if volume is set at minimum.
• Check to see if computer supports an audio signal through DisplayPort.
• If unsure, contact the computer manufacturer.
• When LINE OUT is not functioning, check to see if SURROUND is ON.
• Check Internal/External speaker switch.

Remote Control is not available
• Check the Remote Control’s batteries status.
• Check if batteries are inserted correctly.
• Check if the Remote Control is pointing at the monitor’s remote sensor.
• Check the IR LOCK SETTINGS status.
• The remote control system may not function when direct sunlight or strong illumination strikes the remote control sensor of the LCD monitor, or when there is an object in the path.
Either light vertical or horizontal stripes may appear, depending on the specific display pattern. This is no product fault or degradation.

“SCHEDULE”/“OFF TIMER” function is not working properly
• The “SCHEDULE” function will be disabled when the “OFF TIMER” is set.
• If the “OFF TIMER” function is enabled and the power to the LCD monitor is turned off when the power supply is interrupted unexpectedly, then the “OFF TIMER” will be reset.

Snowy Picture, Poor Sound in TV
• Check antenna/cable connection. Use new cable if necessary.

USB Hub does not operate
• Check to make sure the USB cable is properly connected. Refer to your USB device User’s Manual.
• Check if the USB upstream port on the monitor is connected to the USB downstream port on the computer. And make sure the computer is ON.

Interference in TV
• Check components for shielding, move away from monitor if necessary.

RS-232C or LAN control is not available
• Check RS-232C (reverse type) or LAN cable (category 5 or higher) connection.
## Specifications - X841UHD

### Product Specifications

**LCD Module**
- Pixel Pitch: 0.4845 mm
- Resolution: 3840 x 2160
- Color: Over 1073 million colors (depending on video card used)
- Brightness: 500 cd/m² (Max.), 380 cd/m² (Factory setting Typ.) @25°C
- Contrast Ratio: 1400:1
- Viewing Angle: 89° (typ) @ CR>10

**Frequency**
- Horizontal: 31.5 kHz - 133.3 kHz (Digital Input)
- Vertical: 24.0 - 85.0 Hz

**Pixel Clock**
- 25 MHz - 300 MHz (HDMI), 25 MHz - 330 MHz (Dual Link), 25 MHz - 540 MHz (DisplayPort)

**Viewable Size**
- 1860.5 x 1046.5 mm

NEC DISPLAY SOLUTIONS is strongly committed to environmental protection and sees recycling as one of the company’s top priorities in trying to minimize the burden placed on the environment. We are engaged in developing environmentally-friendly products, and always strive to help define and comply with the latest independent standards from agencies such as ISO (International Organisation for Standardization) and TCO (Swedish Trades Union).

Disposing of your old NEC product
The aim of recycling is to gain an environmental benefit by means of re-use, upgrading, reconditioning or reclamation of material. Dedicated recycling sites ensure that environmentally harmful components are properly handled and securely disposed. To ensure the best recycling of our products, NEC DISPLAY SOLUTIONS offers a variety of recycling procedures and gives advice on how to handle the product in an environmentally sensitive way, once it has reached the end of its life.

All required information concerning the disposal of the product and country-specific information on recycling facilities can be found on our following websites:
http://www.nec-display-solutions.com/greencompany/ (in Europe),
http://www.nec-display.com (in Japan) or
http://www.necdisplay.com (in USA).

Energy Saving
This monitor features an advanced energy saving capability. When a Display Power Management signal is sent to the monitor, the Energy Saving mode is activated. The monitor enters a single Energy Saving mode.

For Energy Saving information: [Default setting: AUTO STANDBY]

For ErP Lot6/EnergyStar requirement:
Setting: DISPLAY PROTECTION → POWER SAVE → AUTO STANDBY
        EXTERNAL CONTROL → LAN POWER → OFF
        ADVANCED OPTION 1 → INPUT DETECT → NONE
Power consumption: Less than 0.5 W
Time for power management function: Approx. 180 sec.

For ErP Lot26 requirement:
Setting: DISPLAY PROTECTION → POWER SAVE → AUTO POWER SAVE
        EXTERNAL CONTROL → LAN POWER → OFF
        ADVANCED OPTION 1 → INPUT DETECT → NONE
Power consumption: Less than 6.0 W (with 1 port activating)/Less than 6.0 W (with all ports activating)
Time for power management function: Approx. 5-600 sec. (Depend on setting)
WEEE Mark (European Directive 2012/19/EU)

Within the European Union

EU-wide legislation, as implemented in each Member State, requires that waste electrical and electronic products carrying the mark (left) must be disposed of separately from normal household waste. This includes monitors and electrical accessories, such as signal cables or power cords. When you need to dispose of your NEC display products, please follow the guidance of your local authority, or ask the shop where you purchased the product, or if applicable, follow any agreements made between yourself and NEC.

The mark on electrical and electronic products only applies to the current European Union Member States.

Outside the European Union

If you wish to dispose of used electrical and electronic products outside the European Union, please contact your local authority so as to comply with the correct disposal method.

For EU: The crossed-out wheeled bin implies that used batteries should not be put to the general household waste! There is a separate collection system for used batteries, to allow proper treatment and recycling in accordance with legislation.

According the EU directive 2006/66/EC, the battery can’t be disposed improperly. The battery shall be separated to collect by local service.
